## Symbols glossary

 <p><b>Triple Fan Technology:</b> The oven is equipped with an exclusive three fan system, which, combined with the increased power of the motors, enables excellent cooking performance. The two large side fans distribute the air around the outer perimeter of the cavity while the smaller central fan increases ventilation by creating a vertical vortex of heat. Accordingly, the temperature within the cavity is uniform, allowing food to be cooked evenly on all five levels, like in professional kitchens.</p>	 <p><b>A+:</b> Energy efficiency class A+ helps to save up to 10% energy compared to class A. Maximum performance with minimum consumption is guaranteed.</p>
 <p><b>Child lock:</b> some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.</p>	 <p><b>Air cooling system:</b> to ensure a safe surface temperatures.</p>
 <p><b>Defrost by time:</b> with this function the time of thawing of foods are determined automatically.</p>	 <p><b>Quadruple glazed:</b> Number of glazed doors.</p>
 <p><b>Automatic lighting switches off:</b> for greater energy savings, the lighting switches off automatically after one minute from the start of cooking.</p>	 <p><b>Electric</b></p>
 <p><b>Enamel interior:</b> The enamel interior of all Smeg ovens have a special antacid lining which helps keep the interior clean by reducing the amount of cooking grease adhering to it.</p>	 <p><b>Fan with upper and lower elements:</b> The elements combined with the fan aim to provide more uniform heat, a similar method to conventional cooking, so pre-heat is required. Most suitable for items requiring slow cooking methods.</p>
 <p><b>Upper and lower element only:</b> a traditional cooking method best suited for single items located in the centre of the oven. the top of the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.</p>	 <p><b>Lower heating element only:</b> This function is ideal for foods that require extra base temperature without browning, e.g. pastry dishes, pizza. Also suitable for slow cooking of stews and casseroles.</p>
 <p><b>Circulaire with lower element:</b> The addition of the lower element adds extra heat at the base for food which requires extra cooking.</p>	 <p><b>Circulaire:</b> The combination of the fan and circular element around it gives a hot air cooking method. This provides many benefits including no preheat if cook time is more than 20 minutes, no flavour transfer when cooking different foods at the same time, less energy, and shorter cook times. Good for all types of food.</p>
 <p><b>ECO:</b> The combination of the grill, fan and lower element is particularly suitable for cooking small quantities of food.</p>	 <p><b>Grill element:</b> Using of grill gives excellent results when cooking meat of medium and small portions, especially when combined with a rotisserie (where possible). Also ideal for cooking sausages and bacon.</p>

- 

Fan with grill element: The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.

Pizza function: The simultaneous operation of three elements ensures an optimum cooking facility when used with the Smeg pizza stone.
- 

Circulaire with upper and lower elements: The use of the fan with both elements allows food to be cooked quickly and effectively, ideal for large joints that require thorough cooking. It offers a similar result to rotisserie, moving the heat around the food, instead of moving the food itself, enabling any size or shape to be cooked.

All glass inner door: All glass inner door, a single flat surface which is simple to keep clean.
- 

The inner door glass: can be removed with a few quick movements for cleaning.
