

SFPR9606TPNR

Category	Reduced height 90cm
Product Family	Oven
Power supply	Electric
Heat source	Electric
Cooking method	Thermo-ventilated
Cleaning system	Pyrolytic
EAN code	8017709321024

Aesthetics

Aesthetics	Dolce Stil Novo	Glass Type	Eclipse
Colour	Black	Door	Full glass
Finishing	Gloss	Handle	Dolce Stil Novo
Design	Flat	Handle Colour	Black
Component finish	Copper	Logo	Applied
Material	Glass		

Controls

			
Display name	VivoScreen max	No. of display languages	11
Display technology	TFT	Display languages	Italiano, English (UK), Français (FR), Nederlands, Español (ES), Português (PT), Svenska, Русский, Deutsch (DE), Dansk, Polski
Control setting	Advanced full touch		

Programs / Functions

No. of cooking functions	10
Automatic programmes	48
Customisable recipes	64

Traditional cooking functions

 Static	 Fan assisted	 Circulaire
		
Turbo (circulaire + bottom + upper + fan)	 ECO	 Large grill
 Fan grill (large)	 Base	 Fan assisted base
 Pizza		

Other functions

 Defrost by time	 Defrost by weight	 Proving
 Keep warm	 Plate rack/warmer	 Sabbath

Cleaning functions

 Pyrolytic

Options

								
Time-setting options		Delay start and automatic end cooking						
Minute minder		Yes						
Timer		3						
Controls Lock / Child Safety		Yes						
Other options		Keep warm, Eco light, Language setting, Digital clock display, Brightness, Tones, Tones volume						
Cooking with probe thermometer		Yes						
Multi-step cooking		Yes, up to 3 steps						
		Smart cooking		Yes				
		Showroom demo option		Yes				
		Demo-tutorial mode		Yes				
		Touch guide		Yes				
		History		Yes, the last 10 functions utilised				
		Rapid pre-heating		Yes				
		Instant GO		Yes				

Technical Features

										
Minimum Temperature		30 °C				Heating suspended when door is opened		Yes		
Maximum temperature		280 °C				Door opening type		Standard opening		
Shelf positions		4								

Double fan	3	Door	Cool
No. of lights	2	Removable door	Yes
Light type	Halogen	Full glass inner door	Yes
User-replaceable light	Yes	Removable inner door	Yes
Light power	40 W	Total no. of door glasses	4
Light when door is opened	Yes	Soft Close hinges	Yes
Lower heating element power	1700 W	Cooling system	Tangential
Upper heating element - Power	1200 W	Cooling duct	Double
Grill element - power	1700 W	Speed Reduction Cooling System	Yes
Large grill - Power	2900 W	Usable cavity space dimensions (HxWxD)	283x724x418 mm
Circular heating element - Power	1550 W	Temperature control	Electronic
Circular heating element 2 - Power	1550 W	Cavity material	Easy clean enamel

Performance / Energy Label

Energy efficiency class	A+	Energy consumption in forced air convection	4.64 MJ
Net volume of the cavity	85 litres	Energy consumption per cycle in fan-forced convection	1.29 kWh
Energy consumption per cycle in conventional mode	0.74 kWh	Number of cavities	1
Energy consumption in conventional mode	2.66 MJ	Energy efficiency index	81,3 %

Accessories Included

Chrome shelf	1	Telescopic Guide rails, total Extraction	1
Extra deep enamelled tray (40mm)	1	Temperature probe	Yes, single point
Grill mesh	1		

Electrical Connection

Voltage	220-240 V	Frequency (Hz)	50/60 Hz
Current	15 A	Power supply cable length	115 cm
Nominal power (W)	3300 W		

Not included accessories

BNP608T

Teflon-coated tray, 8mm depth, to be placed on the grid

PPR9

Refractory pizza stone without handles. Squared shaped stone: L64xH2,3xP37,5 cm Suitable also for gas ovens, to be put on the griddle.

Symbols glossary

	Triple Fan Technology: The oven is equipped with an exclusive three fan system, which, combined with the increased power of the motors, enables excellent cooking performance. The two large side fans distribute the air around the outer perimeter of the cavity while the smaller central fan increases ventilation by creating a vertical vortex of heat. Accordingly, the temperature within the cavity is uniform, allowing food to be cooked evenly on all five levels, like in professional kitchens.		Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.
	Air cooling system: to ensure a safe surface temperatures.		Defrost by time: with this function the time of thawing of foods are determined automatically.
	Defrost by weight: With this function the defrosting time is determined		The 6.3" VIVOscreen Max display is the most complete and advanced colour touch interface available for the automatic management of programmes such as Delta T, Multi-step and SameTime.
	Quadruple glazed: Number of glazed doors.		Automatic lighting switches off: for greater energy savings, the lighting switches off automatically after one minute from the start of cooking.
	Electric		A+: Energy efficiency class A+ helps to save up to 10% energy compared to class A. Maximum performance with minimum consumption is guaranteed.
	Enamel interior: The enamel interior of all Smeg ovens have a special antacid lining which helps keep the interior clean by reducing the amount of cooking grease adhering to it.		Fresh Touch: Most of Smeg ovens have a "cool door." Thanks to the combination of tangential cooling and internal heat-reflecting glasses, the temperature on the outer surface of the door is maintained below 50° C. In addition to providing safety, this system protects the sides of the furniture from overheating by the oven.
	Circogas: In gas ovens the fan distributes the heat quickly and evenly throughout the oven cavity, avoiding flavour transfer when cooking a number of different dishes at the same time. In electric ovens this combination completes cooking more quickly of foods that are ready on the surface, but that require more cooking inside, without further browning.		Fan with upper and lower elements: The elements combined with the fan aim to provide more uniform heat, a similar method to conventional cooking, so pre-heat is required. Most suitable for items requiring slow cooking methods.
	Upper and lower element only: a traditional cooking method best suited for single items located in the centre of the oven. the top pf the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.		Lower heating element only: This function is ideal for foods that require extra base temperature without browning, e.g. pastry dishes, pizza. Also suitable for slow cooking of stews and casseroles.

 <p>Circulaire: The combination of the fan and circular element around it gives a hot air cooking method. This provides many benefits including no preheat if cook time is more than 20 minutes, no flavour transfer when cooking different foods at the same time, less energy, and shorter cook times. Good for all types of food.</p>	 <p>ECO: The combination of the grill, fan and lower element is particularly suitable for cooking small quantities of food.</p>
 <p>Grill element: Using of grill gives excellent results when cooking meat of medium and small portions, especially when combined with a rotisserie (where possible). Also ideal for cooking sausages and bacon.</p>	 <p>Fan with grill element: The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.</p>
 <p>Pizza function: The simultaneous operation of three elements ensures an optimum cooking facility when used with the Smeg pizza stone.</p>	 <p>Circulaire with upper and lower elements: The use of the fan with both elements allows food to be cooked quickly and effectively, ideal for large joints that require thorough cooking. It offers a similar result to rotisserie, moving the heat around the food, instead of moving the food itself, enabling any size or shape to be cooked.</p>
 <p>Compact appliances with a height of 48 cm. Perfect solution to meet the functional requirements of kitchen sets of small height. Available in several types and in different styles.</p>	 <p>All glass inner door: All glass inner door, a single flat surface which is simple to keep clean.</p>
 <p>The inner door glass: can be removed with a few quick movements for cleaning.</p>	 <p>Keep warm: This function allows you to keep precooked foods warm.</p>
 <p>Side lights: Two opposing side lights increase visibility inside the oven.</p>	 <p>Pyrolytic: Pyrolytic cleaning cycles can be selected as necessary to automatically clean the oven interior.</p>
 <p>Warming up: An option for dish warming and keeping the prepared meals hot.</p>	 <p>Cooking with temperature probe: It is possible to display the temperature detected by the probe and set a target temperature that the dish must reach. When the core of the dish reaches the desired temperature, cooking stops</p>
 <p>Air at 40°C provides the perfect environment for proving yeast type dough mixes. Simply select the function and place dough in the cavity for allotted</p>	 <p>Rapid preheat: The rapid preheat function can be used to reach the selected temperature in just a few minutes.</p>
 <p>Sabbath: This function allows you to cook food whilst respecting the provisions of the Jewish day of rest.</p>	 <p>Touch guide: By holding down any symbol for 3 seconds you can get information on its function</p>
 <p>The oven cavity has 4 different cooking levels.</p>	 <p>Smart Cooking System: for the perfect cooking it is simply necessary choosing the kind and the weight of food and the cooking temperature: any other setting will be established automatically.</p>

Soft close: all models are equipped with advanced function of smooth closing of the door, which allows the device to close smoothly and quietly.

Telescopic rails: allow you to pull out the dish and check it without having to remove it from the oven entirely.

The capacity indicates the amount of usable space in the oven cavity in litres.

Instant go: activating this option allows cooking to start immediately. Preheating is included in the cooking time and the oven will gradually reach the desired temperature. Particularly suitable for frozen foods.

Step cooking: It is possible to set up to 3 cooking phases in the same recipe by varying function, time and / or temperature. At the end of a phase the next one will start automatically

Electronic control: Allows you to maintain temperature inside the oven with the precision 2-3 ° C. This enables to cook meals that are very sensitive to temperature changes, such as cakes, souffles, puddings.
