# **Compatible Accessories**

### SCRP

Non-scratch hob scraper - suitable for induction and ceramic hobs

### Symbols glossary

Power booster: option allows the zone to work at full power when very intense cooking is necessary.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

Touch control

CUT\_OUT\_STANDARD\_72dpi

ECO-logic: option allows you to restrict the power limit of the appliance real energy saving.

Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.

Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.

Min diameter pot detection of 9 cm

Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.

Time elapsed: shows how long the cooking zone has been in use.

Timer: All ceramic hobs have a timer which automatically ends cooking after a preset time.

### Benefit (TT)

#### Induction hobs

Fast cooking and precise temperature control

#### Glass

Brightness and elegance in the kitchen: the acid-etched glass gives the surface a refined, modern look that enhances the space.

#### Ceramic

Stability and design even up to 700°C: the cooktop material resists high temperatures without deforming, maintaining aesthetics and functionality even with intensive use.

Immediate access to functions via touch display, for simple and intuitive control

#### Control knob position frontal

Instant and intuitive control thanks to front controls, easily accessible for practical use.

Energy consumption optimization with Eco-Logic Advance, allowing absorption limitation from  $2.4~\mathrm{kW}$  in  $0.1~\mathrm{kW}$  steps

Nine power levels and Boost function for optimal cooking performance

#### Bridge Flexible Zone

Large surface created by merging two adjacent zones, ideal for large dishes
