|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  <p>Power booster: option allows the zone to work at full power when very intense cooking is necessary.</p> |  <p>Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.</p> |
|  <p>The slider control panel allows you to adjust the power simply by passing your finger across the touch device.</p> |  <p>CUT_OUT_STANDARD_72dpi</p> |
|  <p>Eco-Heat: this function warns when the zone is still hot after being switched off. As well as ensuring maximum safety by preventing burns, this also allows you to make use of residual heat to continue cooking or keep foods hot.</p> |  <p>This function allows you to keep cooked food warm without burner it</p> |
|  <p>Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.</p> |  <p>Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.</p> |
|  <p>Multizone: allows several pans to be used at once, large or small, offering freedom of placement and greater flexibility</p> |  <p>Overfill protection: The special overfill protection shuts down the stove in the presence of overflow of liquids.</p> |
|  <p>All cooking zones can be reduced to the minimum power level, so the hob can be left unattended for a short period without food overcooking or burning. Then just press again this function, the previously set power levels can be reactivated.</p> |  <p>Quick selection, with one touch cooking begins at the highest level, then automatically reduces after time. Ideal for dishes that require quick boiling and then continued cooking without constant control (eg beef broth).</p> |
|  <p>Quick Start function: the chosen temperature is reached faster. The heating element works at maximum power until the right temperature is reached.</p> |  <p>Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.</p> |
|  <p>Time elapsed: shows how long the cooking zone has been in use.</p> |  <p>Timer: All ceramic hobs have a timer which automatically ends cooking after a preset time.</p> |
|  <p>Permanent auto pot detection</p> |  <p>Connection between hob and hood</p> |
|  <p>Grill function</p> |  <p>Min diameter pot detection of 7 cm</p> |
|  <p>Possibility to set the maximum power absorbion of the hob</p> |  <p>Additional maximum power level for a better energy consumption</p> |
|  <p>Compact Slider back-lighted ghost effect</p> |  <p>Automatic merge of zones for a bigger area</p> |
