Symbols glossary

Power booster: option allows the zone to work at full power when very intense cooking is necessary.

CUT_OUT_STANDARD_72dpi

Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.

Time elapsed: shows how long the cooking zone has been in use.

Min diameter pot detection of 9 cm.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.

Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.

Timer: All ceramic hobs have a timer which automatically ends cooking after a preset time.
