Technical Features

indication

Front centre - Induction - single - 1.30 kW - Booster 1.40 kW - Ø 16.0 cm Rear centre - Induction - single - 2.30 kW - Booster 3.00 kW - Ø 21.0 cm

Automatic setting Yes Automatic switch off Yes

according to pan when overheat

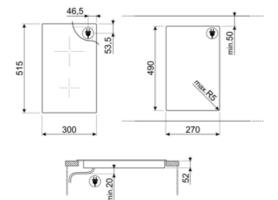

dimension Residual heat indicator Yes Automatic pan Yes Protection against Yes

detection accidental start up Minimum pan diameter Yes

Electrical Connection

Nominal power (W) 3500 W Type of electric cable Single phase Current 16 A Frequency (Hz) 50/60 Hz Voltage (V) 220-240 V Power supply cable 120 cm

length

SMEG SPA 25/11/2025

Compatible Accessories

SCRP

Induction and ceramic hobs and teppanyaki scraper

TPK

Stainless steel grill plate to cook Teppanyaki dishes

SMEG SPA 25/11/2025

Symbols glossary

Power booster: option allows the zone to work at full power when very intense cooking is necessary.

Ultra-low profile: Installation of product with flat edge - height of 1 mm.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

Touch control

Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.

Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.

Quick Start function: the chosen temperature is reached faster. The heating element works at maximum power until the right temperature is reached.

Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.

Time elapsed: shows how long the cooking zone has been in use.

Timer: All ceramic hobs have a timer which automatically ends cooking after a preset time.
