|  | Power booster: option allows the zone to work at full power when very intense cooking is necessary. |  | Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed. |

|  | Eco-Off: This energy-saving function shuts the zone down before the timer sounds, making use of the residual heat in the pan. |  | Giant zone: The giant zone offers extra space and flexibility. |
|  | Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit. |  | Induction: The work of these hobs is based on the principle of electromagnetic induction.
