Symbols glossary

Power booster: option allows the zone to work at full power when very intense cooking is necessary.

Touch control

ECO-logic: option allows you to restrict the power limit of the appliance real energy saving.

Giant zone: The giant zone offers extra space and flexibility.

Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.

All cooking zones can be reduced to the minimum power level, so the hob can be left unattended for a short period without food overcooking or burning. Then just press again this function, the previously set power levels can be reactivated.

Timer: All ceramic hobs have a timer which automatically ends cooking after a preset time.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

Eco-Heat: this function warns when the zone is still hot after being switched off. As well as ensuring maximum safety by preventing burns, this also allows you to make use of residual heat to continue cooking or keep foods hot.

Eco-Off: This energy-saving function shuts the zone down before the timer sounds, making use of the residual heat in the pan.

Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.

Overfill protection: The special overfill protection shuts down the stove in the presence of overflow of liquids.

Time elapsed: shows how long the cooking zone has been in use.
