Symbols glossary

Power booster: option allows the zone to work at full power when very intense cooking is necessary.

Standard installation: Traditional installation in tabletop, suitable for any kitchen sets

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

Knobs control

CUT_OUT_STANDARD_72dpi

ECO-logic: option allows you to restrict the power limit of the appliance real energy saving.

Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.

Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.

Quick Start function: the chosen temperature is reached faster. The heating element works at maximum power until the right temperature is reached.

Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.
