Permanent auto pot detection

Automatic Boiling function: a sensor confirms once the boiling point has been reached and then an acoustic alert signals that the ingredients can be added, saving time and energy.

Powerbooster: optie zorgt ervoor dat de zone op vol vermogen werkt wanneer zeer intensief koken nodig is.

Kinderslot: sommige modellen zijn voorzien van een apparaat om het programma / de cyclus te vergrendelen zodat het niet kan per ongeluk veranderd

7 inches TFT touch, high resolution display, true colours

The slider control panel allows you to adjust the power simply by passing your finger across the touch device.

Possibility to freely move the pot everywhere without turn off the initial settings chosen.

Elegant silver or black glass with under glass serigraphy which allows smoothness, briliance and no noise to the surface

This function allows you to keep cooked food warm without burner it

Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.

Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.

Melting function, suitable for slowly melting delicate foods such as chocolate or butter.

Overfill protection: The special overfill protection shuts down the stove in the presence of overflow of liquids.

All cooking zones can be reduced to the minimum power level, so the hob can be left unattended for a short period without food overcooking or burning. Then just press again this function, the previously set power levels can be reactivated.

Possibility to set the maximum power absorbion of the hob.

Quick selection, with one touch cooking begins at the highest level, then automatically reduces after time. Ideal for dishes that require quick boiling and then continued cooking without constant control (eg beef broth).

Quick Start function: the chosen temperature is reached faster. The heating element works at maximum power until the right temperature is reached.

Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.

Simmering function: ideal for long-cooking recipes, preventing food from boiling over or sticking to the pan.

Time elapsed: shows how long the cooking zone has been in use.

Timer: All ceramic hobs have a timer which automatically ends cooking after a preset time.
