Symbols glossary

Automatic Boiling function: a sensor confirms once the boiling point has been reached and then an acoustic alert signals that the ingredients can be added, saving time and energy.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

This function allows you to keep cooked food warm without burner it

Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.

Overfill protection: The special overfill protection shuts down the stove in the presence of overflow of liquids.

Quick selection, with one touch cooking begins at the highest level, then automatically reduces after time. Ideal for dishes that require quick boiling and then continued cooking without constant control (eg beef broth).

Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.

Time elapsed: shows how long the cooking zone has been in use.

TWIN_ZONE_72dpi

Possibility to set the maximum power absorbion of the hob.

Elegant silver or black glass with under glass serigraphy which allows smoothness, briliance and no noise to the surface

Power booster: option allows the zone to work at full power when very intense cooking is necessary.

The slider control panel allows you to adjust the power simply by passing your finger across the touch device.

Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.

Melting function, suitable for slowly melting delicate foods such as chocolate or butter.

All cooking zones can be reduced to the minimum power level, so the hob can be left unattended for a short period without food overcooking or burning. Then just press again this function, the previously set power levels can be reactivated.

Quick Start function: the chosen temperature is reached faster. The heating element works at maximum power until the right temperature is reached.

Simmering function: ideal for long-cooking recipes, preventing food from boiling over or sticking to the pan.

Timer: All ceramic hobs have a timer which automatically ends cooking after a preset time.

Permanent auto pot detection

7 inches TFT touch, high resolution display, true colours
