Compatible Accessories

GRILLPLATE

Universal griddle for induction, gas, ceramic and electric hobs. Non-stick surface ideal for cooking meat, cheese and vegetables. Dimensions: 410 x 240 mm.

TPK

Stainless steel grill plate to cook Teppanyaki dishes

SCRP

Induction and ceramic hobs and teppanyaki scraper

TPKPLATE

Universal plate for induction, gas, ceramic and electric hobs. Non-stick surface ideal for cooking fish, eggs and vegetables. Dimensions: 410 X 240 mm.

Permanent auto pot detection

Power booster: option allows the zone to work at full power when very intense cooking is necessary.

The slider control panel allows you to adjust the power simply by passing your finger across the touch device.

Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.

Multizone: allows several pans to be used at once, large or small, offering freedom of placement and greater flexibility

PAUSE_72dpi

Quick Start function: the chosen temperature is reached faster. The heating element works at maximum power until the right temperature is reached.

Time elapsed: shows how long the cooking zone has been in use.

TWIN_ZONE_72dpi

Min diameter pot detection of 9 cm

Perfect fit in a 80 cm cabinet

Evolution Slider totally Back-lighted ghost effect

Connection between hob and hood

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

Keep warm function: Keep warm function keeps the cooked food heated. In this mode the heating zone operates at a minimum capacity for 120 minutes and then turns off automatically.

Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.

Overfill protection: The special overfill protection shuts down the stove in the presence of overflow of liquids.

Quick selection, with one touch cooking begins at the highest level, then automatically reduces after time. Ideal for dishes that require quick boiling and then continued cooking without constant control (eg beef broth).

Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.

Timer: All ceramic hobs have a timer which automatically ends cooking after a preset time.

Grill function

Possibility to set the maximum power absorbion of the hob

Darkness becomes light
