

# SIM662WLDR

Product Family Hob
Built-in type Traditional
Dimensions 60 cm
Power supply Electric
Type Induction

**EAN code** 8017709221942

### **Aesthetics**

Permanent auto pot detection

Standard installation: Traditional installation in tabletop, suitable for any kitchen sets.

The slider control panel allows you to adjust the power simply by passing your finger across the touch device.

Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.

Melting function, suitable for slowly melting delicate foods such as chocolate or butter.

Overfill protection: The special overfill protection shuts down the stove in the presence of overflow of liquids.

Quick selection, with one touch cooking begins at the highest level, then automatically reduces after time. Ideal for dishes that require quick boiling and then continued cooking without constant control (eg beef broth).

Simmering function: ideal for long-cooking recipes, preventing food from boiling over or sticking to the pan.

Timer: All ceramic hobs have a timer which automatically ends cooking after a preset time.

Darkness becomes light

Power booster: option allows the zone to work at full power when very intense cooking is necessary.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

This function allows you to keep cooked food warm without burner it

Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.

Multizone: allows several pans to be used at once, large or small, offering freedom of placement and greater flexibility

All cooking zones can be reduced to the minimum power level, so the hob can be left unattended for a short period without food overcooking or burning. Then just press again this function, the previously set power levels can be reactivated.

Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.

Time elapsed: shows how long the cooking zone has been in use.

Min diameter pot detection of 9 cm

Premium individual Slider control for each zone
