Technical Features

Front left - Induction - Multizone - 2.10 kW - Booster 3.60 kW - 18.0x23.0 cm

Rear left - Induction - multizone - 2.10 kW - Booster 3.60 kW - 18.0x23.0 cm

Front centre - Induction - Multizone - 2.10 kW - Booster 3.60 kW - 18.0x23.0 cm

Rear centre - Induction - multizone - 2.10 kW - Booster 3.60 kW - 18.0x23.0 cm

Front right - Induction - Multizone - 2.10 kW - Booster 3.60 kW - 18.0x23.0 cm

Rear right - Induction - multizone - 2.10 kW - Booster 3.60 kW - 18.0x23.0 cm

Multizone left - Booster 3.60 kW - 38.5x23.0 cm Multizone center - Booster 3.60 kW - 38.5x23.0 cm

Multizone right - Booster 3.60 kW - 38.5x23.0 cm

Automatic setting according to pan

dimension

Automatic pan Yes, min 9 cm

detection

Permanent Automatic Yes Pot Detection with indication of the relative

control

Automatic switch off

when overheat

Permanent auto pot detection

Standard installation: Traditional installation in tabletop, suitable for any kitchen sets

The slider control panel allows you to adjust the power simply by passing your finger across the touch device.

Overheat protection: The safety system that automatically turns off the hob in case of overheating of the control unit.

Melting function, suitable for slowly melting delicate foods such as chocolate or butter.

Overfill protection: The special overfill protection shuts down the stove in the presence of overflow of liquids.

Quick selection, with one touch cooking begins at the highest level, then automatically reduces after time. Ideal for dishes that require quick boiling and then continued cooking without constant control (eg beef broth).

Simmering function: ideal for long-cooking recipes, preventing food from boiling over or sticking to the pan.

Timer: All ceramic hobs have a timer which automatically ends cooking after a preset time.

Darkness becomes light

Power booster: option allows the zone to work at full power when very intense cooking is necessary.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

Keep warm function: Keep warm function keeps the cooked food heated. In this mode the heating zone operates at a minimum capacity for 120 minutes and then turns off automatically.

Induction: The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.

Multizone: allows several pans to be used at once, large or small, offering freedom of placement and greater flexibility

PAUSE_72dpi

Indication of residual heat: After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.

Time elapsed: shows how long the cooking zone has been in use.

Min diameter pot detection of 9 cm

Premium individual Slider control for each zone
