

# SO4104APG

<b>Categorie</b>	45 cm
<b>Familie</b>	Oven
<b>Vitality system</b>	Ja
<b>Voeding</b>	Elektrisch
<b>Warmte bron</b>	Elektrisch
<b>Bereidingswijze</b>	Multitech
<b>Technologie</b>	Omnichef
<b>Reinigingsysteem</b>	Vapor Clean
<b>EAN-code</b>	8017709326784

## Design

<b>Esthetiek</b>	Linea	<b>Type glas</b>	Clear1
<b>Kleur</b>	Neptune Grey	<b>Kleur serigrafie</b>	Zwart
<b>Afwerking</b>	Mat	<b>Deur</b>	Geheel glas
<b>Design</b>	Plat	<b>Handgreep</b>	Linea minimal
<b>Afwerking componenten</b>	Zilver	<b>Kleur handgreep</b>	Satin metal and black
<b>Materiaal</b>	Glas	<b>Logo</b>	Geassembleerd

## Bediening

<b>Naam display</b>	VivoScreen	<b>Aantal weergaven talen</b>	20
<b>Display technologie</b>	TFT	<b>Weergave taal</b>	Italiano, English (UK), Français (FR), Français (CA), Nederlands, Español (ES), Español (MX), Português (PT), Svenska, Русский, Deutsch (DE), Dansk, Norsk, Polski, English (AU), Suomi, Ukrainian, Kazakh, Afrikaans (ZA), Zulu (ZA)
<b>Regeling bediening</b>	Advanced full touch		

## Programma's / functies

<b>Aantal kookfuncties</b>	26
<b>Automatische programma's</b>	150
<b>Vochtigheidsniveaus</b>	3 + manual
<b>Personaliseerbare recepten</b>	10

### Traditionele kookfuncties

- |  |  |   |
|--|--|---|

<b>Automatische uitschakeling verhittingselementen bij openen deur</b>	Ja	<b>Water aansluiting</b>	Fill&Hide 2 , automatisch
<b>Deur openen</b>	Standaard opening	<b>Inhoud waterreservoir</b>	2 l
<b>Deur</b>	Koud		

## Prestaties / energielabel

Netto inhoud 40 l  
Aantal ovens 1

Effectief magnetronvermogen 900 W

## Meegeleverde accessoires

Ovenrooster met stop 1  
Geëmailleerde diepe bakplaat (50mm) 1  
Inzetrooster 1  
Rvs ovenschaal 1

Diepe geperforeerde rvs ovenschaal (40 mm) 1  
Glazen ovenplaat 1  
Telescopische geleiders, geheel uitschuifbaar 1  
Kerntemperatuurmeter Ja, multipoint

## Elektrische aansluiting

Spanning 220-240 V  
Stekker Nee  
Stroom 13 A

Nominale aansluitwaarde 3000 W  
Frequentie 50/60 Hz  
Lengte voedingskabel 150 cm

## Compatibele Accessoires

### AIRFRY

Airfryerrek AIRFRY . Ideaal voor traditioneel frituren in de oven, maar met minder calorieën en minder vet. Hiermee creëer je snel en eenvoudig gerechten zoals frites, gebakken groenten en vis, waardoor ze perfect bruin en krokant worden.

### BBQ

Dubbelzijdig

### BN640

Geëmailleerde bakplaat, 40 mm diep

### ET20

Geëmailleerde bakplaat, 20 mm diep

### GTP2

Gedeeltelijk uittrekbare telescopische geleiders (1 niveau), geschikt voor traditionele ovens. Ze zijn gemaakt van roestvrij staal en garanderen stabiliteit en vergemakkelijken het uitnemen van de trays.

### GTTV2

Volledig uittrekbare telescopische geleiders (1 niveau), geschikt voor stoomovens. Ze zijn gemaakt van roestvrij staal en garanderen stabiliteit en vergemakkelijken het uitnemen van de trays.

### PR3845N

Black cover for furniture when more ovens are installed in column

### AIRFRY2

Air fryer tray. Ideal for recreating traditional frying in the oven, but with fewer calories and less fat. It allows you to cook quickly and simply dishes such as French fries, fried vegetables and fish, ensuring perfect browning and crispiness.

### BN620-1

Geëmailleerde bakplaat, 20 mm diep

### BX640PL

Roestvrijstalen geperforeerde lade. Voor het bereiden van vele soorten groenten, vis, wit vlees, ravioli of andere soorten gevulde pasta, waarbij alle vitamines en minerale zouten behouden blijven voor een rijkere, vollere en natuurlijke smaak

### ET50

Geëmailleerde bakplaat, 50 mm diep

### GTT2

Totally extractable telescopic guides (1 level), suitable for traditional ovens. Made in stainless steel, they guarantee stability and facilitate the smooth extraction of the trays.

### PALPZ

Pizzaschep met inklapbare handgreep breedte: 315 mm lengte: 325 mm

### PR3845X

Antifingerprint roestvrij staal. Afdekstrip voor meubels in kolominstallatie van meer ovens

## STONE2

Rectangular pizza stone without handles, suitable for 45cm and 60cm wide ovens. Dimensions W42 x H1.8 x D37.5cm. Ideal for cooking pizzas with the same results as a typical wood-fired oven. Can also be used for baking bread, focaccias and other recipes such as pies, flans or biscuits

## Symbols glossary

	Kinderslot: sommige modellen zijn voorzien van een apparaat om het programma / de cyclus te vergrendelen zodat het niet kan per ongeluk veranderd		Ontdooien op tijd: met deze functie wordt automatisch het tijdstip van ontdooien van voedsel bepaald
	Ontdooien op gewicht: Met deze functie wordt de ontdooitijd bepaald		Ontkalkingsfunctie: Is essentieel om overtollige kalksteenafzetting in de tank te verwijderen en de goede werking van het product mogelijk te maken. De noodzaak om deze handeling uit te voeren, wordt door het product zelf aangegeven.
	Viervoudige beglazing: aantal glazen deuren.		Automatische verlichting gaat uit: voor meer energiebesparing schakelt de verlichting automatisch uit na één minuut na het begin van de bereiding.
	Electric		Geëmailleerde binnenkant: De geëmailleerde binnenkant van alle Smeg-ovens heeft een speciale antacidumvoering die helpt om de binnenkant schoon te houden door de hoeveelheid kookvet te verminderen.
	Fresh Touch: Most of Smeg ovens have a "cool door." Thanks to the combination of tangential cooling and internal heat-reflecting glasses, the temperature on the outer surface of the door is maintained below 50° C. In addition to providing safety, this system protects the sides of the furniture from overheating by the oven.		Ventilator met bovenste en onderste elementen: de elementen in combinatie met de ventilator zijn bedoeld om een meer gelijkmatige warmte te bieden, een methode die vergelijkbaar is met conventioneel koken, dus voorverwarmen is vereist. Het meest geschikt voor items die langzaam koken vereisen.
	De ovenruimte wordt tegelijk door het onder- en bovenelement verwarmt. De hitteverdeling over het gerecht is afhankelijk van het niveau waarop men dit plaatst. Geschikt voor bakken op 1 niveau. Gerechten: alle ovenschotels, vlees, gevogelte, brood, (gevulde) taarten. Speciaal: gans en eend (bevatten veel vet).		De ovenruimte wordt uitsluitend verhit door het onderelement. Voor gerechten die een hoge basistemperatuur behoeven, heeft deze bakstand weinig tot geen invloed op de korst aan de bovenzijde. Geschikt voor bakken op 1 niveau, ideaal voor deeggerechten die moeten rijzen (bijv. pizza). Bij gevulde taarten zal de deegbodem beter droog blijven.
	Circulaire with lower element: The addition of the lower element adds extra heat at the base for food which requires extra cooking.		Circulaire: it is the perfect function for cooking all types of dishes in a more delicate way. The heat comes from the back of the oven and is distributed quickly and evenly. The fan is active. It is also ideal for cooking on multiple levels without mixing smells and flavors.
	ECO: low energy consumption cooking: this function is particularly suitable for cooking on a single shelf with low energy consumption. It is recommended for all types of food except those that can generate a lot of moisture (for example vegetables). To achieve maximum energy savings and reduce time, it is recommended to put the food in the oven without preheating the cooking compartment.		De warmte wordt geproduceerd door het grill- en bovenelement. Verhitting over het volledige oppervlak. De thermostaat wordt, afhankelijk van het gerecht, in de regel op de maximale stand gezet. Bij een korte baktijd kan de ovendeur gesloten blijven; bij langere baktijd blijft deze gedeeltelijk geopend. Voor vleesgerechten (klein- en middelgroot), vleespennen, vis, groenten, gratineren etc.

Ventilator met grillelement: De ventilator vermindert de felle hitte van de grill en biedt een uitstekende methode om verschillende soorten voedsel, karbonades, steaks, worstjes enz. Te grillen, waardoor het gelijkmatig bruin wordt en de warmte wordt verdeeld, zonder het voedsel uit te drogen. De bovenste twee niveaus die voor gebruik worden aanbevolen, en het onderste deel van de oven kunnen worden gebruikt om gerechten tegelijkertijd warm te houden, een uitstekende mogelijkheid bij het bereiden van een gegrild ontbijt. Halve grill (alleen middengedeelte) is ideaal voor kleine hoeveelheden voedsel.

Cooking with the simultaneous use of the heating element in combination with fan and microwave supply.

Fan combined with traditional cooking, where heat is generated from above and below, provides uniform heat. Adding the microwave function allows the same cooking results in less time.

Sous Vide Cooking: Steam function for perfect cooking of sous vide dishes. Enhances the taste of dishes and keeps their appearance and nutrients unaltered. Vacuum cooking (Sous Vide) made with the help of a steam oven is also an incredible healthy and genuine type of cooking. The Sous Vide cooking technique allows heat to be efficiently transferred from the steam to the food, avoiding the loss of flavor due to oxidation and the evaporation of nutrients and moisture during cooking. Sous Vide cooking also allows better control over the cooking of food compared to traditional methods, ensuring uniform cooking results. It also allows cooking at a lower temperature than traditional cooking.

Fan assisted + Steam: intense and homogeneous cooking. The fan is active and the heat comes from below and from above at the same time. The addition of steam allows better preservation of the organoleptic properties of food and improves the internal cooking of foods, which are more crunchy and digestible. Ideal for roast veal, roast duck and for cooking whole fish.

Microwave: Penetrating straight into the food, microwaves cook very quickly and with considerable energy savings. Suitable for cooking without fat, they are also able to thaw and heat food without altering its original appearance and aroma. The microwave function can also be combined with conventional functions with all the resulting advantages. Ideal for all types of food.

Microwave + grill element: The use of the grill results in a perfect browning of the surface of the food. The action of microwaves allows instead of cooking in a short time the internal part of the food.

Pizza function: Specific function for cooking pizza in a pan. It allows to obtain a pizza that is soft inside and crispy outside with the topping perfectly cooked, not dry and not burnt.

Steam cooking: it's a natural way of cooking for any kind of products, from vegetables to desserts, to preserve the nutritional and organoleptic properties of ingredients. Ideal for cooking without fat, to heat up food without drying. Steam is ideal for simultaneous cooking of meals that require different cooking times.

Circulaire + Steam: The addition of steam to thermoventilated cooking allows better preservation of the organoleptic properties of food. The heat comes from the back of the oven and is distributed quickly and evenly. The fan is active. It is the perfect function for cooking all types of dishes in a more delicate way. It is also ideal for cooking on multiple levels without mixing smells and flavors. Ideal for preparing roasts, chicken and baked goods such as leavened cakes and bread.

Place the baking tray on the lowest shelf and stack the dishes to be heated.</p>  |  <p>Temperature probe: with the temperature probe it is possible to perfectly cooking roasts, loins, meat of various cuts and sizes. In fact, the probe improve food cooking, thanks to the precise control of the temperature at the heart of the dish. The core temperature of the food is measured by a special sensor located inside the tip. When the instant temperature reaches the target temperature set by the user, cooking is finished</p> |
|  <p>Air at 40°C provides the perfect environment for proving yeast type dough mixes. Simply select the function and place dough in the cavity for allotted</p>   |  <p>Rapid preheating: cooking is preceded by the preheating phase which allows the cooking compartment to reach the set temperature. This option reduces the time by up to 50%.</p>  |
|  <p>SABBATH: function that allows to cook food respecting Judaism's day of rest provisions.</p>  |  <p>Option designed to solve any doubts More than 100 pop-ups, which can be triggered with a long touch on any icon, provide information on the use of the display and cooking.</p>  |
|  <p>The oven cavity has 2 different cooking levels.</p>  |  <p>Smart Cooking is the perfect recipe for every occasion. Meat, fish, pasta, desserts, etc . up to 150 automatic recipes that allow to make any preparation in a single click. Decide your menu and then the oven takes care of the rest.</p>  |

-  Soft close: all models are equipped with advanced function of smooth closing of the door, which allows the device to close smoothly and quietly.
-  Telescopic rails: allow you to pull out the dish and check it without having to remove it from the oven entirely.
-  Vapor Clean: a simple cleaning function using steam to loosen deposits in the oven cavity.
-  The capacity indicates the amount of usable space in the oven cavity in litres.
-  Keep warm: the function allows to keep cooked food warm.
-  Active and controlled microwave distribution. The Microwave Stirrer fan distributes the waves evenly within the oven, reducing the need for a turntable.
-  Only with Galileo Multi Cooking technology is it possible to combine up to three different technologies and take the best out of them: steam, microwave, convection cooking. Ovens of this generation can use any of these cooking methods individually or can combine them as desired. Both following a horizontal cooking approach (multistep) in which the various cooking techniques are arranged in sequence, and a vertical approach (multitech) in which there is a totally free combination of the three of them at the same time. Steam is healthy, microwaves are fast and traditional cooking is crispy. The oven knows how to dose them and use them wisely to guarantee innovative results with a time saving up to 70% comparing to traditional cooking.
-  To guarantee the optimal functioning of the appliance, it is suggested to carry out the tank cleaning roughly once every 2-3 months.
-  Electronic control: Allows you to maintain temperature inside the oven with the precision 2-3 ° C. This enables to cook meals that are very sensitive to temperature changes, such as cakes, souffles, puddings.
-  The capacity indicates the amount of usable space in the oven cavity in litres.
-  The 4.3" VIVOscreen display offers an advanced colour touch interface, for automatic management of firing programmes such as Delta T, Multi-step and SameTime firing.
-  INSTANT GO: activating this option allow to start cooking immediately. Preheating is included in the cooking time and the oven will gradually reach the desired temperature Particularly suitable for frozen foods.
-  The multi-point temperature probe has three detection points. This means that not only the core temperature is detected, but also the temperature in other areas. The oven will process all these data to avoid cooking unevenness. In this way each product can be cooked in a professional, restaurant style.
-  The water load system is designed to enhance the aesthetics of the oven. The loading and unloading tube can be easily removed from the oven and the water refilled at any time during the cooking cycle, without opening the door, guaranteeing an infinite duration of steam.

The perfect way to have a complete menu in a few simple steps with a considerable saving of time. The large cavity can accommodate multiple types of food at the same time, which can be cooked without any exchange of odors. The carefully studied thermodynamic flows ensure uniform cooking at every level. The SameTime algorithm calculates the times, the cooking functions and all the parameters so that 3 foods can be ready at the same time.

Dedicated cooking function for the double sided plate BBQ. Suitable for recreating succulent and crispy dishes in the oven with the typical taste of grilled cooking. The ribbed side is particularly suitable for meats and cheeses; the smooth side for fish, seafood and vegetables.

Dedicated cooking function for the rectangular refractory stone PPR2 Dimensions Ideal for cooking pizzas with the same results as a typical wood-fired oven. Can also be used for baking bread, focaccias and other recipes such as pies, flans or biscuits

DeltaT cooking The oven automatically sets the cavity temperature to a predefined temperature (named deltaT) higher than the core temperature detected by the probe. When the probe detects an extra degree at the core, the oven automatically increases also its internal temperature by one degree. The oven offers the possibility to choose between three different deltaT cooking modes (slow, medium and fast) and to set any desired core temperature. A concentration of technology that makes it possible to obtain tender, juicy, healthy products of the highest quality.

Function to soften butter and cheese It is useful for quickly bringing frozen desserts to serving temperature The function can also be used to soften ice cream

The inverter technology allows to generate microwaves continuously and at the desired power. The constant flow, without on and off cycles, allows you to precisely control the temperature, reduce times, avoids wasting energy and allows you to obtain excellent cooking, defrosting and re-heating results, thanks to the smaller difference between core and surface temperature in food.

Speciale kookfunctie voor het Airfryerrek AIRFRY. Ideaal voor het nabootsen van traditioneel frituren in de oven, maar met minder calorieën en minder vet. Hiermee kook je snel en eenvoudig gerechten zoals frites, gebakken groenten en vis, waardoor ze perfect bruin en krokant worden.

The double chimney technology create a special airflow inside the cavity that reduce the condensation inside the cavity during microwave cooking, where the cavity is cold and the food is warm

Function to melt butter and chocolate without using the bain-marie

Function for the preparation of popcorn packaged in bags
