## Symbols glossary

 A+: Energy efficiency class A+ helps to save up to 10% energy compared to class A. Maximum performance with minimum consumption is guaranteed.	 Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.
 Combination steam: ovens can be used either as a steam oven, or as a traditional oven, or alternatively the two methods can be combined.	 Air cooling system: to ensure a safe surface temperatures.
 Defrost by time: with this function the time of thawing of foods are determined automatically.	 Defrost by weight: With this function the defrosting time is determined
 Descaling function: Is essential to remove excess deposits of limestone in the tank and allow the proper operation of the product. The need to perform this operation is signaled by the product itself.	 Quadruple glazed: Number of glazed doors.
 Automatic lighting switches off: for greater energy savings, the lighting switches off automatically after one minute from the start of cooking.	 Electric
 Enamel interior: The enamel interior of all Smeg ovens have a special antacid lining which helps keep the interior clean by reducing the amount of cooking grease adhering to it.	 Fresh Touch: Most of Smeg ovens have a "cool door." Thanks to the combination of tangential cooling and internal heat-reflecting glasses, the temperature on the outer surface of the door is maintained below 50° C. In addition to providing safety, this system protects the sides of the furniture from overheating by the oven.
 Fan with upper and lower elements: The elements combined with the fan aim to provide more uniform heat, a similar method to conventional cooking, so pre-heat is required. Most suitable for items requiring slow cooking methods.	 Upper and lower element only: a traditional cooking method best suited for single items located in the centre of the oven. the top pf the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.
 Lower heating element only: This function is ideal for foods that require extra base temperature without browning, e.g. pastry dishes, pizza. Also suitable for slow cooking of stews and casseroles.	 Circulaire with lower element: The addition of the lower element adds extra heat at the base for food which requires extra cooking.
