consumption per cycle

Led colour Red Series Ecoline

Technical Features

Trays number $7 \times GN 1/1 (530 \times 325 \text{ mm})$ Max. inlet temperature 60 °C

Trays washing option Yes Max water hardness 12°f - 7°dH Water consumption per 3,2 | Water inlet pressure 1-6 bar / 10

Water consumption per 3,2 l Water inlet pressure 1-6 bar / 100-600 kPa cycle

Detergent flow rate 1.5 l/h

Wash temperature 60 °C

Wash temperature 60 °C Rinse aid flow rate 0.4 l/h (min-max) Usable load height 340 mm Rinse temperature (min- 85 °C

max) Depth with door open 1000 mm Warm water connection 8°C

Programmes

3 automatic programs; Self-cleaning programs **Programs**

Program options Extra rinse; Clean water cycle Program table Electronic Ecoline dishwasher 500

Maximum baskets/hour Maximum plates/hour 720 Maximum glasses/hour 1440

Rack guides

Accessories Included

Flat basket

Plate basket PB50D01 Water supply pipe Yes - 1.5m Yes - 2m Cutlery basket 1x PHOOS04 Drain pipe

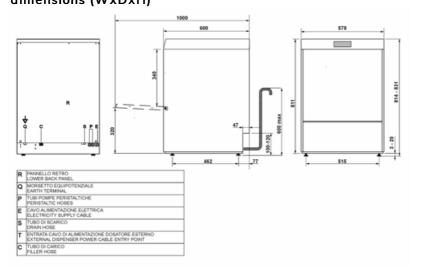

Equipment

Drain pump	Yes	Cycle counter	Yes
Peristaltic detergent	Yes, electronic control	Break tank	Yes
dispenser		Partial water exchange	Yes
Peristaltic rinse-aid dispenser	Yes, electronic control	in the wash tank via built-in drain pump	
Chemical dosing	gr/lt	Water supply pipe	16 mm
Rinse boiler Thermostop	Yes - default	diameter	
system		Drain supply pipe	21.5 mm
Wash tank Thermostop	Yes	diameter	
system		Detergent (red) hose	Yes, manual
Wash pump soft start	Yes	length	
system		Rinse aid (blue) hose	Yes, manual
Option for auto daily switch on	Yes	length	

Logistic Information

Compatible Accessories

PB50D01

Basket made of polypylene for 18 plates 500x500

PB50G02

Universal basket in polypropylene 500x500

PHOOGR5

Glass basket for 500x500 mm glasswashers

PHOOS01

Single basket in polypropylene for cutlery

PHOOS04

4 compartments polypropylene basket for cutlery

WS5

Underframe for glasswahsers 500mm

Symbols glossary

Suitable for 1/1GN trays

HTR rinsing system

5 stand filter

MAX.USABLE HEIGHT 340mm

Benefit

Interface

Control panel with electronic buttons

The electronic control panel features an intuitive interface with soft-touch buttons, allowing easy selection of one of the three wash programmes: short, medium, or intensive. There are also buttons for power, selection, and cycle start. The display provides real-time monitoring of the tank and boiler temperature, as well as diagnostics, ensuring effortless and immediate control of the main functions.

4-stage filtration system

Deep cleaning and spotless washes with the Patented 4-Stages Filtration System

The innovative Smeg filtration system consists of 4 stages to completely eliminate all impurities: the 1st stage captures larger food residues; in the 2nd stages, finer particles are captured at this filtration stage; the 3th stage features a pre-filtration grid to prevent debris from entering the tank and clouding the water. Finally, the last stage is designed to further protect the washing and draining pumps from any debris that may accidentally enter the tank during filter cleaning.

HTR System

Consistent temperatures and pressures for uniform and effective dishwashing

Thanks to the HTR system (High Temperature Rinse) and the presence of the atmospheric boiler combined with the Thermostop, the cold inlet water does not enter the boiler during rinsing, ensuring a constant temperature of 85°C. The HTR system keeps the water hot for deep sanitisation and quick drying, ensuring constant pressure for uniform and effective cleaning.

Moulded tank

Superior washing performance and enhanced cleaning convenience with molded tub bottoms and basket guides

Smeg dishwashers are designed with moulded tank and basket guides. The absence of sharp edges ensures an optimised wash flow, guaranteeing hygiene and impeccable cleaning performance. Furthermore, this innovative design simplifies machine cleaning, reducing the need for maintenance interventions.

Partial double skin

Optimised thermal and acoustic insulation

The double-skin design of the Ecoline features dual insulation on the door, top, and rear panel, while the side panels have a single layer of insulation. This structure optimises energy efficiency by minimising heat loss. Additionally, it provides effective acoustic insulation, helping to reduce noise levels and ensuring a quieter, more comfortable working environment for staff.

Drain pump

Partial water replacement during the wash cycle for clean and hygienic dishes

The standard drain pump, equipped with a partial water exchange system, ensures that the dirtiest water is automatically removed at every wash cycle. This mechanism allows for continuous renewal of the water used, ensuring that each phase of the washing process is carried out with clean water. The result is optimal dishwashing performance, with outstanding efficiency and an impeccable level of hygiene.

Soft-start system

Effective management of the washing pump to protect your glassware

The Soft-Start function initiates the wash cycle gently and gradually, progressively increasing the water pressure. This system has been designed to provide optimal protection for the most fragile items, such as crystal glasses, significantly reducing the risk of chipping or damage. At the same time, it ensures excellent cleaning performance, combining efficiency and safety in every wash cycle.
