| <b>Depth packed product</b>  | 630 mm | <b>Net weight</b>                | 44,000 kg   |
| <b>Height packed product</b> | 820 mm | <b>Gross weight (kg)</b>         | 51,000      |

## Compatible Accessories

### KITRB40G01

Kit of 2 wire round baskets and adaptor for Ecoline

### PB40G01

Universal flat bottom polypropylene basket, dim. (WxDxH) 400x400x125 mm

### PHOOS01

Polypropylene single basket for cutlery

### RB40A3

Adapter for round basket for all 400 glasswasher models 460 mm wide

### WB40D01

Wire basket for 8 dishes Ø315 mm, dim. 400x400 mm

### WB40G02

Wire basket with sloped bottom for glasses Ø90 mm max, dim. (WxDxH) 400x400x168 mm

### WB40PG4

Wire basket for plastic glasses, dim. (WxDxH) 400x400x210 mm

### PB40C02

Universal flat bottom polypropylene double basket, dim. (WxDxH) 400x400x227 mm

### PHOGR4

Glass insert for 400x400 mm basket

### PHOOS02

6 compartment polypropylene basket for cutlery

### RB40G01

Universal wire basket with flat bottom, dim. (ØxH) 400x140 mm

### WB40G01

Universal wire basket with flat bottom, dim (WxDxH) 400x400x120 mm

### WB40G03

Sloped bottom 3 compartments wire basket for glasses Ø120 mm max, dim. (WxDxH) 400x400x168 mm

### WH00S01

Wire insert for 12 small dishes

### WS4

Stainless steel underframe for glasswashers, dim. (WxDxH) 495x530x490 mm

## Benefit (TT)

---

### Interface

Control panel with electronic buttons

The electronic control panel features an intuitive interface with soft-touch buttons, allowing easy selection of one of the three wash programmes: short, medium, or intensive. There are also buttons for power, selection, and cycle start. The display provides real-time monitoring of the tank and boiler temperature, as well as diagnostics, ensuring effortless and immediate control of the main functions.

### 4-stage filtration system

Deep cleaning and spotless washes with the Patented 4-Stages Filtration System

The innovative Smeg filtration system consists of 4 stages to completely eliminate all impurities: the 1st stage captures larger food residues; in the 2nd stages, finer particles are captured at this filtration stage; the 3th stage features a pre-filtration grid to prevent debris from entering the tank and clouding the water. Finally, the last stage is designed to further protect the washing and draining pumps from any debris that may accidentally enter the tank during filter cleaning.

### Moulded tank

Superior washing performance and enhanced cleaning convenience with molded tub bottoms and basket guides

Smeg dishwashers are designed with moulded tank and basket guides. The absence of sharp edges ensures an optimised wash flow, guaranteeing hygiene and impeccable cleaning performance. Furthermore, this innovative design simplifies machine cleaning, reducing the need for maintenance interventions.

### Integrated softener

Effective water treatment for consistently sparkling glasses

The integrated continuous regeneration water softener ensures effective water treatment, enhancing washing performance and preserving the machine's operational lifespan. The resin regeneration process takes place during the wash cycle without interruptions, providing constant control over water hardness. This system prevents limescale buildup, maximises detergent efficiency, and guarantees spotless results on glassware and dishes.

### Partial double-skin

Optimised thermal and acoustic insulation

The Ecoline undercounter dishwashers are equipped with a partial double-skin structure that optimises energy efficiency by minimising heat loss. Additionally, it provides effective acoustic insulation, helping to reduce noise levels and ensuring a quieter, more comfortable working environment for staff.

### Drain pump

Partial water replacement during the wash cycle for clean and hygienic dishes

The standard drain pump, equipped with a partial water exchange system, ensures that the dirtiest water is automatically removed at every wash cycle. This mechanism allows for continuous renewal of the water used, ensuring that each phase of the washing process is carried out with clean water. The result is optimal dishwashing performance, with outstanding efficiency and an impeccable level of hygiene.

---

## Soft-start system

Effective management of the washing pump to protect your glassware

The Soft-Start function initiates the wash cycle gently and gradually, progressively increasing the water pressure. This system has been designed to provide optimal protection for the most fragile items, such as crystal glasses, significantly reducing the risk of chipping or damage. At the same time, it ensures excellent cleaning performance, combining efficiency and safety in every wash cycle.
