

SP05L2SL

Family Professional ovens

Subfamily Combi steam oven 5 trays GN1/1

Power supply Electric

Oven type Galileo Professional combi steam

400 V 3N~ / 17 A / 8 kW / 50-60 Hz Power supply

Adjustable feet Yes

Product dimensions (WxDxH) 790x833x645 mm

Maximum depth with open door 1567 mm

Target

Industries Hotels; Restaurants;

> Bakeries / Pastry shops; Food Industries; Care facilities; Food retail; Catering and Institutions

Oven materials	Stainless steel / glass /	Exhaust position	Back
	plastics	Components cooling	Yes
Cavity dimensions	670x560x420 mm	system	
(WxDxH)		Timer type	Electrical
Cavity material	Stainless steel	Temperature range	30-270°C
Shelves number	5	End cooking signal	Yes
Tray frame support	Stainless steel AISI 304	Safety switch with open	Yes
Adapter kit for trays	Yes	door	
600x400 mm		Manual reset safety	Yes
Shelves distance	70 mm GN1/1 - 90 mm EN	thermostat	
	600x400	Removable deflector	Yes
Door construction	Triple glass	Detergent type	Liquid
Door opening	Lateral - left hinge	Light switch with open	Yes
Handle type	Rotating	door	
Glass	Openable with hinge	Lighting	1 LED lamp
Fan motor power	200 W	Light power	3.6 W
Engine rpm	Progressive %	USB port	Yes
Motor rpm in standard	2850 rpm	Water load pipe	Yes
speed		Water entries number	1
Motor rpm in low speed	1425 rpm	External detergent	Yes
Water injection on each	Yes	containers system	
fan		Water inlet pressure	200-1000 kPa (min-max)
Humidification levels	Automatic / Percentage	Power cable length	170 cm
	progressive	Back panel	Galvanized
Steam control	5-100% (min-max)	IPX protection	IPX4
Open boiler	Yes	•

Compatible Accessories

3743

Kit of 4 flat aluminum trays EN 600×400

3751

Flat perforated aluminium tray (4pcs)

3805

Kit of 4 chrome-plated wire grids EN 600×400 mm

3810

Kit of 4 wave wire grids for baquettes EN 600×400 mm

CLB45LSE

Flow meter for filter FB45LSE1100

FB45LSE1100

Water treatment filter for Galileo Professional oven: 7.907 litres capacity with 10 Kh hardness and bypass set 1

G11T

Non-stick GN1/1 tray

G11X8P

8 vertical GN1/1 chicken grid

KITDPEC

Galileo professional external detergent lance kit

KITSTCK55

Conjunction kit between 2 stacked Galileo ovens (SPO4 or SPO5)

R4EN6040

Galileo Professional oven tray support kit for 4 EN 600x400 mm trays

T11TH20

GN1/1 non-stick tray, 20 mm height

TB45LSE

Water treatment filter head for Galileo Professional ovens

TF11XH2

GN 1/1 perforated aluminium tray, 20 mm height

TMF11TH2

GN 1/1 non-sticking microperforated tray, 20 mm height

Symbols glossary

Œ E

Electric

Humidity and heat controlled proving

Fan speed adjustable between 50 and 100% of the speed

Core probe baking by temperature difference (Δ t)

Fan forced heating

Automatic washing

Dry heat for a perfect grill

Steam generated by injectiong water into the fan and evaporation on the heating element

Saturated steam created by boiling in the cavity

Steam and hot air combined cooking

Low cooking sous-vide

Benefit (TT)

Hinged opening

Easily accessible glass for effortless maintenance and cleaning

The glass panels are designed to be easily accessible and inspectable, ensuring great convenience during cleaning and maintenance operations. This feature significantly simplifies the process, making it quick and efficient, while ensuring that every intervention can be carried out with maximum comfort and complete safety.

WashArt System

Efficient washing, optimised consumption, and minimal space usage

The WashArt washing system, equipped with a rotating nozzle, ensures even distribution of water and detergent within the cavity, providing deep cleaning and quick drying. To meet every need, four washing programmes are available: Short, Medium, Long, and Grill, along with a dedicated rinse programme. Thanks to its advanced technology, WashArt optimises efficiency and reduces consumption, while the rotating nozzle, with its compact design, minimises space usage in the cooking chamber.

Fan speed

Precise fan speed modulation for consistently even cooking results

In the Galileo Professional ovens, the fan speed can be adjusted from a minimum of 50% to a maximum of 100%, in 5% increments. This feature allows for precise customisation of the airflow, perfectly adapting it to the specific needs of each preparation. Thanks to this versatility, it is possible to achieve flawless cooking results, ensuring even and accurate heat distribution. Moreover, precisely adjusting the fan speed helps preserve the delicacy of sensitive foods, preventing exposure to excessive heat and creating the ideal conditions to maintain their lightness and internal structure.

Core probe

Multipoint cooking sensor for precise and uniform results

Optimal precision and control thanks to the four temperature measurement points, ensuring an accurate reading at every stage of cooking. The advanced sensor precisely detects the heat at the core of the food, guaranteeing the ideal cooking level for consistently perfect and uniform results.

SteamArt Technology

Open Boiler system to generate steam directly within the cavity, in quick times and at very low temperatures

Thanks to the innovative Open Boiler system, steam is generated directly within the cavity, in very short times and at very low temperatures (starting from 30°C, ideal for supporting the proofing phase). This system is particularly suited for delicate cooking processes that require the use of 100% steam, ensuring even and gentle cooking that preserves the nutritional properties, taste, and texture of the food.

8 cooking stages

Flexibility and precision in every cooking stage

The ability to set multiple cooking phases, in addition to preheating and keeping warm, gives the combi-steam oven exceptional versatility, responding precisely to the diverse needs of every preparation. Each phase of the cooking process can be customised with great accuracy, optimising results whether it's slow cooking at low temperatures or achieving a perfect final browning. Thanks to the advanced control of steam and heat parameters, it is possible to achieve even cooking on every surface, significantly enhancing the quality of the finished product and ensuring flawless results.

System for external detergent tanks

Efficient cleaning operations and optimal resource management

Some oven models are designed to use an external detergent tank and are equipped with dedicated suction hoses. This solution provides greater autonomy, reducing the need for frequent refills, and significantly simplifies the detergent replenishment process. As a result, cleaning operations become more efficient and continuous, without interruptions, ensuring optimal resource management and high hygiene performance.
