

## SP05R2SD

**Family** Professional ovens

Combi steam oven 5 trays GN1/1 Subfamily

Power supply Electric

Oven type Galileo Professional combi steam

oven

Trays capacity 5 trays GN1/1

400 V 3N~ / 17 A / 8 kW / 50-60 Hz Power supply

Other electrical connection 230 V 3~ / 18 A / 8 kW / 50-60 Hz Direct and Open boiler Steam generation

Adjustable feet Yes

Product dimensions (WxDxH) 790x875x645 mm

Maximum depth with open door 1623 mm

## **Target**

**Industries** Hotels; Restaurants;

> Butcher shops / Delicatessens; Care facilities; Commercial food services; Grocery shops /

Food retail

## **Aesthetics**

Door with stainless

steel stripes

Colour Display type Yes

Yes Yes

## **Options**

Right hand hinge Yes Combinable hood K510X

## Accessories included

**Probe** 4 points external core probe

#### **Electrical Connection**

Plug Not present

### Construction

Oven materials Stainless steel / glass / Drain diameter 1" 1/2 - DN 40 mm plastics Exhaust position Back

Cavity dimensions 670x560x420 mm Components cooling Yes

(WxDxH) system

Cavity material Stainless steel Timer type Flec

Cavity materialStainless steelTimer typeElectricalShelves number5Temperature range30-270°C

Tray frame support Stainless steel AISI 304 End cooking signal Yes

Adapter kit for trays Yes Safety switch with open Yes door

Shelves distance 70 mm GN1/1 - 90 mm EN Manual reset safety Yes 600×400

Door construction Triple glass Removable deflector Yes

Door openingLateral - left hingeDetergent typeLiquidHandle typeRotatingIntegrated detergentVanishing 3I

Glass Openable with hinge tank

Fan type and number 1 fan with direction reversal 1 LED lamp Lighting 3.6 W Pulse fan Yes Light power Fan motor power 200 W **USB** port Yes Engine rpm Progressive % Drain water cooling Yes

Motor rpm in standard 2850 rpm system

Speed Water entries number 1

Motor rpm in low speed 1425 rpm Water load pipe Yes

Water injection on each Yes Water inlet pressure 200-1000 kPa (min-max) fan Power cable length 170 cm

Humidification levels None Back panel Galvanized Steam control 5-100% (min-max) IPX protection IPX4

Open boiler Yes

## **Logistic Information**

Packed product 700x850x950 mm Net weight 105,000 kg dimensions (WxDxH) Gross weight 115,000 kg

dimensions (WxDxH) Gross weight 115,000 kg
EAN code 8017709339975

## **Compatible Accessories**

#### **CLB45LSE**

Flow meter for filter FB45LSE1100

#### FB45LSE1100

Water treatment filter for Galileo Professional oven; 7.907 litres capacity with 10 Kh hardness and bypass set 1

#### FB45LSE500

Water treatment filter for Galileo Professional oven; 4.675 litres capacity with 10 Kh hardness and bypass set 1

#### **G11T**

Non-stick GN1/1 tray

#### **G11X8P**

8 vertical GN1/1 chicken grid

#### KCAM5

Chimney kit for Galileo Professional 4 and 5 trays

#### KITSTCK55

Conjunction kit between 2 stacked Galileo ovens (SPO4 or SPO5)

#### R4EN6040

Galileo Professional oven tray support kit for 4 EN 600x400 mm trays

#### **RUTVL**

Set of 4 wheels, fits all professional oven

#### **STDH**

8-shelf tray holder stand with 80 mm pitch, for Galileo Professional oven, for GN 1/1 and EN 600x400 mm trays, dim. (WxDxH) 800x750x850

#### **STDM**

4-level tray holder stand with 80 mm pitch, for Galileo Professional oven, for GN 1/1 and EN 600x400 mm tray, dim. (WxPxH) 800x750x500 mm

#### T11TH20

GN1/1 non-stick tray, 20 mm height

#### T11TH40

GN1/1 non-stick tray, 40 mm height

#### T11XH20

Aluminium GN1/1 tray, 20 mm height

#### T11XH65

GN1/1 aluminium tray, 65 mm height

T8S11T

# 8 holes GN 1/1 non-sticking tray

#### TB45LSE

Water treatment filter head for Galileo Professional ovens

#### TF11XH2

GN 1/1 perforated aluminium tray, 20 mm height

## Symbols glossary

**#** 

Electric

Humidity and heat controlled proving

Fan speed adjustable between 50 and 100% of the speed

Core probe baking by temperature difference ( $\Delta$  t)

Fan forced heating

Automatic washing

Dry heat for a perfect grill

Steam generated by injectiong water into the fan and evaporation on the heating element

Saturated steam created by boiling in the cavity

Steam and hot air combined cooking

Low cooking sous-vide

## Benefit (TT)

#### Hinged opening

Easily accessible glass for effortless maintenance and cleaning

The glass panels are designed to be easily accessible and inspectable, ensuring great convenience during cleaning and maintenance operations. This feature significantly simplifies the process, making it quick and efficient, while ensuring that every intervention can be carried out with maximum comfort and complete safety.

#### WashArt System

Efficient washing, optimised consumption, and minimal space usage

The WashArt washing system, equipped with a rotating nozzle, ensures even distribution of water and detergent within the cavity, providing deep cleaning and quick drying. To meet every need, four washing programmes are available: Short, Medium, Long, and Grill, along with a dedicated rinse programme. Thanks to its advanced technology, WashArt optimises efficiency and reduces consumption, while the rotating nozzle, with its compact design, minimises space usage in the cooking chamber.

#### Fan speed

Precise fan speed modulation for consistently even cooking results

In the Galileo Professional ovens, the fan speed can be adjusted from a minimum of 50% to a maximum of 100%, in 5% increments. This feature allows for precise customisation of the airflow, perfectly adapting it to the specific needs of each preparation. Thanks to this versatility, it is possible to achieve flawless cooking results, ensuring even and accurate heat distribution. Moreover, precisely adjusting the fan speed helps preserve the delicacy of sensitive foods, preventing exposure to excessive heat and creating the ideal conditions to maintain their lightness and internal structure.

#### Core probe

Multipoint cooking sensor for precise and uniform results

Optimal precision and control thanks to the four temperature measurement points, ensuring an accurate reading at every stage of cooking. The advanced sensor precisely detects the heat at the core of the food, guaranteeing the ideal cooking level for consistently perfect and uniform results.

#### SteamArt Technology

Open Boiler system to generate steam directly within the cavity, in quick times and at very low temperatures

Thanks to the innovative Open Boiler system, steam is generated directly within the cavity, in very short times and at very low temperatures (starting from 30°C, ideal for supporting the proofing phase). This system is particularly suited for delicate cooking processes that require the use of 100% steam, ensuring even and gentle cooking that preserves the nutritional properties, taste, and texture of the food.

#### 8 cooking stages

Flexibility and precision in every cooking stage

The ability to set multiple cooking phases, in addition to preheating and keeping warm, gives the combi-steam oven exceptional versatility, responding precisely to the diverse needs of every preparation. Each phase of the cooking process can be customised with great accuracy, optimising results whether it's slow cooking at low temperatures or achieving a perfect final browning. Thanks to the advanced control of steam and heat parameters, it is possible to achieve even cooking on every surface, significantly enhancing the quality of the finished product and ensuring flawless results.

#### 3lt retractable tank

Retractable tank with intelligent detergent level monitoring

The oven is equipped with a practical 3-litre retractable container for liquid detergent, designed to simplify and speed up cleaning operations. Thanks to this tank, up to 45 washes can be carried out before a refill is needed. The detergent level is always monitored via the "detergent level" bar displayed on the screen, which uses three intuitive colours: green to indicate a full tank, yellow for an intermediate level, and red to alert when a refill is required.

#### Waste water cooling

The temperatures are significantly lowered and the thermal impact reduced thanks to the waste water cooling system

Some ovens are equipped with a waste water cooling system that significantly lowers the temperature of the water before it is released, minimising the thermal impact. This mechanism optimises energy efficiency, enhances operational safety, and supports eco-friendly practices, helping to make the oven more sustainable and high-performing.
