## Symbols glossary

	Heavy duty cast iron pan stands: for maximum stability and strength.	
	Installation in column: Installation in column	
	Air cooling system: to ensure a safe surface temperatures.	
	Ever Clean Enamel: Ever Clean enamel is applied electrostatically, corner to corner and edge to edge to prevent cracking or cracks over time. It is a particular pyrolytic enamel, resistant to acids which, in addition to being pleasantly bright, promotes greater cleaning of the oven walls, thanks to its lower porosity. It is baked at over 850 ° C and slowly polymerized at a scientifically determined rate to ensure uniform depth and strength. Ever Clean enamel creates an impeccable finish both on the inside of the oven and on the trays, making the surfaces of the oven incredibly easy to maintain over time as it reduces the adhesion of fat during cooking	
	All glass inner door: All glass inner door, a single flat surface which is simple to keep clean.	
	Automatic opening: some models have Automatic opening door when the cycle is finished which is a perfect solution for handle-less kitchen units as no handle is needed. For safety reasons, the door locks automatically when the machine is in use to avoid it being opened inadvertently.	
	Ultra rapid burners: Powerful ultra rapid burners offer up to 5kw of power.	The capacity indicates the amount of usable space in the oven cavity in litres.
