## Symbols glossary

	Activelight is an led light which projects a red spot onto the floor beneath the dishwasher when the appliance is in use.		The Aquatest sensor is an electronic sensor that measures the degree of water transparency at the end of the initial soaking phase. Based on the values measured, the sensor sets the most suitable programme, thus obtaining the best washing results with the minimum amount of water.
	To improve the drying of dishes without leaving stains.		Energy efficiency class A
	Installation in column: Installation in column.		82 cm high
	Delay Timer: Option to postpone the start of the desired programme by up to 24 hours in order to programme the dishwasher to run at the desired time.		The Dry Assist + option, in addition to saving energy, ensures perfect drying of the dishes by opening the door automatically at the end of the washing cycle.
	EasyGlide: Convenient EasyGlide system for easy unloading of the appliance that allows reaching maximum flexibility of load of the machine.		FlexiDuo: The FlexiDuo 3rd cutlery basket allows you to arrange cutlery or small cups, ladles, or bulky utensils however you like: it consists of two separate and moveable modules.
	FlexiZone: The 1/2 load flexizone allows you to wash a reduced load saving energy, water and time and there are no restrictions on where the items are placed.		The work aimed at continuous improvement has allowed the creation of the second generation of the Inverter motor 2.0, characterised by greater efficiency and durability over time, which allows very high performance and a lower energy consumption and noise level.
	Noise Level: Excellent insulation and special devices keep noise to a minimum.		The Planetarium washing system, with high rotations per minute, guarantees complete coverage of the tank, thanks to the simultaneous rotation of base and sprayers, and excellent washing results.
	Auto 45°- 65°: The auto programme regulates the length of a cycle depending on the need for a pre-wash and the number of rinses required.		Crystals: The Crystals programme is dedicated to delicate dishes such as glasses and china.
	Eco: Eco, this economic wash programme uses a low amount of water and energy in order to provide the most environmentally friendly cleaning option.		Quick wash cycle for normally soiled mixed loads such as dishes and pans, even with dried-on residues. Dishes are washed and dried in 60 minutes.
	Mix: The Mix programme is suitable for mixed crockery and everyday pots and pans, without any particular incrustation.		Dishwasher cleaning cycle. The cycle should be started with the machine empty, without dishes. It is recommended to run the program every 2-3 months, using special dishwasher detergents.
	SILENT: Wash cycle suitable for normally soiled dishes, even with dried-on residues. Ensures maximum noise reduction and is therefore ideal if you wish to run it during the night.		Allows you to enable additional programs when selected together with any wash cycle.

Soak programme: The soak programme provides a rinse to prevent dirt from drying.

Express 27': The Express 27' programme is a quick wash cycle, at low temperatures, for lightly soiled dishes.

Ultraclean: The Ultraclean option performs a final rinse at a high temperature of 70°C eliminating virtually all bacteria.

13 place settings: Number of place settings.

Total Acquastop: In addition to the partial Acquastop protection present in all Smeg dishwashers, some models have an electronic device fitted to the water intake hose, which monitors water levels in the machine, detects leaks in the hose and switches off the water supply immediately when necessary.

System WaterSave ensures the best washing results with minimal water consumption depending on the model of dishwasher.

HYGIENE 99.9% High-temperature washing programme. The 75° rinse guarantees the removal of 99.9% of germs and bacteria.
