## Symbols glossary

The Aquatest sensor is an electronic sensor that measures the degree of water transparency at the end of the initial soaking phase. Based on the values measured, the sensor sets the most suitable programme, thus obtaining the best washing results with the minimum amount of water.

FlexiZone: The  $\frac{1}{2}$  load flexizone allows you to wash a reduced load saving energy, water and time and there are no restrictions on where the items are placed.

The Planetarium washing system, with high rotations per minute, guarantees complete coverage of the tank, thanks to the simultaneous rotation of base and sprayers, and excellent washing results.

Crystals: The Crystals programme is dedicated to delicate dishes such as glasses and china.
