Symbols glossary

	Aquatest measures the clarity of the water during an auto program, and automatically ensures the minimum consumption of water and energy.		Anti-drip: Some models of dishwashers are equipped with special polymer nozzles anti-drip, that improve the process of drying.
	A++: Energy efficiency class A++ helps to save up to 20% energy compared to class A. Maximum performance with minimum consumption is guaranteed.		Energy efficiency class E
	COMM_HEIGHT_82_72dpi		Delay Timer: The delay timer can postpone the start of the program by up to 24 hours.
	EasyGlide: Convenient EasyGlide system for easy unloading of the appliance that allows reaching maximum flexibility of load of the machine.		Fingerprint proof stainless steel: Fingerprint proof stainless steel keeps stainless steel looking as good as new.
	FlexiDuo: The FlexiDuo 3rd cutlery basket allows you to arrange cutlery or small cups, ladles, or bulky utensils however you like: it consists of two separate and moveable modules.		Flexitabs: Flexitabs adjusts the wash cycle to give the best possible results regardless of the type of detergent used.
	FlexiZone: The ½ load flexizone allows you to wash a reduced load saving energy, water and time and there are no restrictions on where the items are placed.		Inverter technology: The evolution of Smeg's driers towards more intelligent and environmentally sustainable models has led to the choice of using Inverter technology with heat pumps, which reduces significantly energy consumption.
	Noise Level: Excellent insulation and special devices keep noise to a minimum.		Orbital wash system distributes water evenly throughout the 60cm dishwasher cavity, directing water with precision to ensure an excellent wash.
	Auto 60°: Program Auto 60 ° is designed for heavily soiled mixed dishes.		Eco: Eco, this economic wash programme uses a low amount of water and energy in order to provide the most environmentally friendly cleaning option.
	Soak programme: The soak programme provides a rinse to prevent dirt from drying.		Ultra Rapid: The program is specifically for Ultra Fast wash very quickly (16 min.). Pots and pans very dirty, even with dried residues.
	Ultraclean: The Ultraclean option performs a final rinse at a high temperature of 70°C eliminating virtually all bacteria.		UniversaleProf: The Universal program is suitable for washing normally soiled tableware, even with little residue dried.
	Professional: Option Professional enables to convert household appliances into semiprofessional ones due to the programs which significantly reduce washing time to obtain an astonishing 16 minutes cycle.		The symbols show the number of plate settings of the dishwasher.

Total Acquastop: In addition to the partial Acquastop protection present in all Smeg dishwashers, some models have an electronic device fitted to the water intake hose, which monitors water levels in the machine, detects leaks in the hose and switches off the water supply immediately when necessary.

System WaterSave ensures the best washing results with minimal water consumption depending on the model of dishwasher.

Benefit

FlexiDuo

For added convenience, the flexible third basket—FlexiDuo—adapts to accommodate various types of dishes, giving you extra space and better organisation with every load

The third FlexiDuo basket consists of two separate sections that can be handled independently of each other, stacked and/or removed, offering loading flexibility for every need. Depending on the arrangement, it allows cups, tall glasses, bulky utensils and pots and pans to be placed in the upper basket.

Orbital Wash System

The Orbital Wash System ensures even water distribution, delivering deep cleaning while keeping noise levels low, thanks to its dual rotating spray arms

Orbital washing system, which, thanks to its double arm, its 7 water exit points and thanks to overlapping and simultaneous rotations and 40 rotations per minute, allows ample coverage of the tank area, thus guaranteeing optimal results in any basket-loading configuration.
