## Especificações técnicas

<b>Fluxo da bomba de lavagem</b>	400 L / min	<b>Profundidade com porta aberta</b>	1200 mm
<b>Temperatura pré-definida de ligação da água</b>	5°C	<b>Altura máxima do cesto inferior</b>	290 mm
<b>Temperatura máxima de entrada:</b>	60°C	<b>Diâmetro máximo de prato para o cesto superior</b>	240 mm
<b>Dureza máxima da água</b>	40°f - 22°dH		

## Programas

<b>Programas</b>	7 automatic programs
<b>Tabela de programas</b>	Thermodisinfection dishwasher
<b>Configuração de programa preferida</b>	Sim
<b>Função repetição</b>	Sim
<b>Regeneration and complete drain cycle</b>	Sim
<b>Temperatura de enxaguamento (máx.)</b>	93 °C

Maximum wash cycle duration with thermal disinfection	34 min
Grade of lethality of thermal disinfection (AI)	AI = 6.000 (93° C / 5') - AI = 12.000 (93° C / 10')
Maximum wash cycle duration	8 min
Maximum place settings capacity	12
Maximum place settings capacity/hour	90

## Ligação elétrica

Potência do elemento de aquecimento do tanque	6400 W	Ligação pré-definida	6800 W
Potência da bomba de lavagem	400 W		

## Interface

Display	4 digit	Alerta de falta de detergente	Sim
Luz indicadora On/Off	Sim	Indicador da fase do programa	Sim
Luz indicadora de falta de sal	Sim	Indicador de fim do programa	Sim
Alerta de falta de abrillantador	Sim	Diagnóstico manual	Sim

## ESPECIFICAÇÕES TÉCNICAS

Cuba	Profundo	Junta da porta	Em 3 lados

### Door lock

Maximum safety during the thermodisinfection cycle

The door lock system prevents opening during the thermodisinfection cycle, ensuring the process runs smoothly and safely, avoiding any accidental interruptions that could compromise the effectiveness of the treatment and preventing the risk of contamination.

### Repeat cycle

The Repeat function reduces consumption by reusing the water from the final rinse

The Repeat function allows the clean water from the final rinse to be reused for the next wash cycle. This feature not only reduces water consumption but also enhances process efficiency, shortening wash times without compromising hygiene or cleaning quality.

### Integrated softener

Effective water treatment for consistently sparkling glasses

The integrated continuous regeneration water softener ensures effective water treatment, enhancing washing performance and preserving the machine's operational lifespan. The resin regeneration process takes place during the wash cycle without interruptions, providing constant control over water hardness. This system prevents limescale buildup, maximises detergent efficiency, and guarantees spotless results on glassware and dishes.

### Chemical dispenser on the door

Optimised space and simplified maintenance

The detergent and rinse aid dispenser positioned on the door optimises the internal space of the machine, reducing clutter and keeping the work area tidy. Additionally, it provides easy access for refills and maintenance without the need to open the main body of the machine.

### SWT

Designed to ensure the highest standards of hygiene and cleanliness

These appliances are designed to ensure high standards of hygiene and cleanliness. The thermodisinfection programmes with a 93°C rinse achieve A0 levels of up to 12000, which cannot be reached by traditional professional dishwashers.

### Moulded tank

Superior washing performance and enhanced cleaning convenience with molded tub bottoms and basket guides

The tank, featuring rounded corners and integrated basket guides, is designed to prevent dirt build-up and make cleaning the machine quick and easy. The moulded base also helps direct any residue towards the filter, ensuring high levels of hygiene and consistently thorough cleaning.
