Symbols glossary

Heavy duty cast iron pan stands: for maximum stability and strength.

Installation in column: Installation in column.

Air cooling system: to ensure a safe surface temperatures.

Ever Clean Enamel: Ever Clean enamel is applied electrostatically, corner to corner and edge to edge to prevent cracking or cracks over time. It is a particular pyrolytic enamel, resistant to acids which, in addition to being pleasantly bright, promotes greater cleaning of the oven walls, thanks to its lower porosity. It is baked at over 850 °C and slowly polymerized at a scientifically determined rate to ensure uniform depth and strength. Ever Clean enamel creates an impeccable finish both on the inside of the oven and on the trays, making the surfaces of the oven incredibly easy to maintain over time as it reduces the adhesion of fat during cooking.

Base: the heat comes only from the bottom of the cavity. The fan is not active. Ideal for sweet and savory pies, cobblers and pizzas. Designed to complete cooking and make food more crunchy. This symbol in gas ovens indicates the gas burner.

Grill: Very intense heat coming only from above from a double heating element. The fan is not active. Provides excellent grilling and gratinating results. Used at the end of cooking, it gives a uniform browning to dishes.

Light

The inner door glass: can be removed with a few quick movements for cleaning.

The oven cavity has 2 different cooking levels.

Telescopic rails: allow you to pull out the dish and check it without having to remove it from the oven entirely.

Knobs control

Double glazed doors: Number of glazed doors.

Alleen boven- en onder element: een traditionele kookmethode die het meest geschikt is voor losse items in het midden van de oven. de bovenkant van de oven zal altijd het heetst zijn. Ideaal voor gebraden vlees, fruitcake, brood etc.

Circulaire: De combinatie van de ventilator en het ronde element eromheen zorgt voor een hete lucht kookmethode. Dit biedt vele voordelen, waaronder geen voorverwarmen als de kooktijd meer dan 20 minuten bedraagt, geen smaakoverdracht bij het gelijktijdig bereiden van verschillende soorten voedsel, minder energie en kortere kooktijden. Geschikt voor alle soorten voedsel.

Half grill: For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.

All glass inner door: All glass inner door, a single flat surface which is simple to keep clean.

Side lights: Two opposing side lights increase visibility inside the oven.

The oven cavity has 4 different cooking levels.

Electronic control: Allows you to maintain temperature inside the oven with the precision 2-3 ° C. This enables to cook meals that are very sensitive to temperature changes, such as cakes, souffles, puddings.

Tilting grill: the tilting grill can be easily unhooked to move the heating element and clean the roof of the appliance in one simple step.

The capacity indicates the amount of usable space in the oven cavity in litres.

Ultra rapid burners: Powerful ultra rapid burners offer up to 5kw of power.
