Produktfamilie

Gewerbespülmaschine

Unterkategorie

Undercounter glasswashers

Korbabmessungen

Ø 400 mm

Rinse pump

HTR system

Serienzubehör

Besteckkorb 1x PHOOS01
Universalkorb 2x RB40G01
Schlauchlänge - Frischwasseranschluss 1,5 m

Schlauchlänge - Abwasseranschluss 2,0 m
Andere Körbe und Zubehör 1x RB40A3

Einsatzbereich

Einsatzbereich Bars/Kaffees

Programme

Spülprogramme Tank 60°C/Boiler 85°C - 2'30"; Tank 60°C/Boiler 85°C - 4'00"; Tank 60°C/Boiler 85°C - 1'30"
Max. theroretische Korbleistung/h 40

Bedienblende

Anzahl der Tasten 5
EIN/AUS-Taste Ja

Autodiagnostik-System mit Fehlercodeanzeige Ja

Konstruktion

HTR-System (Drucksteigerung)

5-Stufen-Filter

Maximale Einschubhöhe 330mm

Benefit (TT)

5-stage system

Deep cleaning and spotless washes with the patented filtration system

The innovative Smeg filtration system consists of 5 stages to completely eliminate all impurities: the 1st stage captures larger food residues; in the 2nd and 3rd stages, finer particles are captured at this filtration stage; the 4th stage features a pre-filtration grid to prevent debris from entering the tank and clouding the water. Finally, the last stage is designed to further protect the washing and draining pumps from any debris that may accidentally enter the tank during filter cleaning.

The presence sensor filter alerts if the filtration system is out of position, ensuring safe washes every time.

HTR System

Consistent temperatures and pressures for uniform and effective dishwashing

Thanks to the HTR system (High Temperature Rinse) and the presence of the atmospheric boiler combined with the Thermostop, the cold inlet water does not enter the boiler during rinsing, ensuring a constant temperature of 85°C. The HTR system keeps the water hot for deep sanitisation and quick drying, ensuring constant pressure for uniform and effective cleaning.

Integrated softener

Effective water treatment for consistently sparkling glasses

The integrated continuous regeneration water softener ensures effective water treatment, enhancing washing performance and preserving the machine's operational lifespan. The resin regeneration process takes place during the wash cycle without interruptions, providing constant control over water hardness. This system prevents limescale buildup, maximises detergent efficiency, and guarantees spotless results on glassware and dishes.

Door

Split and balanced doors for maximum ergonomics

The split and balanced doors have been designed with the aim of optimising ergonomics during tool loading and unloading operations. Their design allows for easier use, minimising the physical effort required from the operator. This helps improve work efficiency while also ensuring greater comfort and safety in the working environment.

Round basket

Versatile solution for bars and cafés

This machine is equipped with a round basket designed to fit perfectly into the sinks of bars, cafés, and bistros, offering maximum versatility for all types of workspaces. Thanks to its compact and functional design, it integrates seamlessly into professional environments, optimising washing operations without compromising efficiency. Ideal for those looking for a practical solution that adapts to varying space requirements.

Soft-start system

Effective management of the washing pump to protect your glassware

The Soft-Start function initiates the wash cycle gently and gradually, progressively increasing the water pressure. This system has been designed to provide optimal protection for the most fragile items, such as crystal glasses, significantly reducing the risk of chipping or damage. At the same time, it ensures excellent cleaning performance, combining efficiency and safety in every wash cycle.
