## Electrical Connection

Tank heating element power 4500 W

Boiler heating element power 7500 W

UW wash pump power 1600W

Default connection 9000 W

Electrical connection options 230 V 3~ / 39,5 A / 9,0 kW / 50 Hz

## Interface

Display 4 digit  
Number of buttons 3

On/off indicator Yes

## Construction

Tank With printed base

Construction Single skinned

Tank material Stainless steel AISI 304

Back panel Galvanized

Upper washing system One washing and one split rinse spray arms, stainless steel

Lower washing system A 3-arms washing and one split rinse spray arms, stainless steel

Tank filter Stainless steel

Rack guides Welded

Filter 2-stages filter system

Wash tank capacity 36 l

Boiler capacity 12 l

Noise level Lpa 51,7 dBA

Protection class IPX4

Adjustable feet Yes

Drain max. height 800 mm

## Accessories Included

Cutlery basket 1 x WH00S02

Flat basket WB5757G01

Water supply pipe Yes - 2,5m

Drain pipe Yes - 2m

## Equipment

Peristaltic detergent dispenser Yes, manual

Water supply pipe diameter 16 mm

Peristaltic rinse-aid dispenser	Yes, manual	Drain supply pipe diameter	21.5 mm
Rinse boiler Thermostop system	Yes - default	Detergent (red) hose length	Yes, manual
Wash pump soft start system	Yes	Rinse aid (blue) hose length	Yes, manual
Break tank	Yes

### Interface

Control panel with electronic buttons

The electronic control panel features an intuitive interface with soft-touch buttons, allowing easy selection of one of the three wash programmes: short, medium, or intensive. There are also buttons for power, selection, and cycle start. The display provides real-time monitoring of the tank and boiler temperature, as well as diagnostics, ensuring effortless and immediate control of the main functions.

### 2-stage system

Two-stage filtration system to ensure optimal washing performance and maximum water purity.

The filtration system is entirely made of AISI 304 stainless steel, ensuring maximum resistance, durability, and corrosion protection. It consists of two filtration stages: the first features a grid that prevents dirt residues from entering the tank, thereby avoiding water clouding; the second protects the washing pumps by retaining any debris that may accidentally enter the tank during filter cleaning.

### HTR System

Consistent temperatures and pressures for uniform and effective dishwashing

Thanks to the HTR system (High Temperature Rinse) and the presence of the atmospheric boiler combined with the Thermostop, the cold inlet water does not enter the boiler during rinsing, ensuring a constant temperature of 85°C. The HTR system keeps the water hot for deep sanitisation and quick drying, ensuring constant pressure for uniform and effective cleaning.

### Door

Split and balanced doors for maximum ergonomics, with double-skin construction

The split, balanced doors are designed to ensure maximum ergonomics during the loading and unloading of utensils, making the process easier and minimising operator effort. Furthermore, the double-skin construction not only provides a robust structure but also ensures excellent thermal and acoustic insulation, helping to maintain a consistent internal temperature and reduce noise levels during operation, further enhancing the user experience.

### Soft-start system

Effective management of the washing pump to protect your glassware

The Soft-Start function initiates the wash cycle gently and gradually, progressively increasing the water pressure. This system has been designed to provide optimal protection for the most fragile items, such as crystal glasses, significantly reducing the risk of chipping or damage. At the same time, it ensures excellent cleaning performance, combining efficiency and safety in every wash cycle.
