## Electrical Connection

Tank heating element power 6000 W  
Boiler heating element power 12000 W  
UW wash pump power 3x2200W

Default connection 18600 W  
Electrical connection options 230 V~ / 78,2 A / 18 kW / 50 Hz  
Plug No

## Interface

Display 4 digit  
Number of buttons 3

On/off indicator Yes

## Construction

Tank Construction With printed base  
Single skinned  
Tank material Stainless steel AISI 304  
Back panel Galvanized  
Upper washing system Two 3-arms washing and two split rinse spray arms, stainless steel  
Lower washing system Two 4-arms washing and two split rinse spray arms, stainless steel  
Tank filter Stainless steel  
Rack guides Welded

Filter 2-stages filter system  
Wash tank capacity 130 l  
Boiler capacity 17 l  
Boiler type Atmospheric boiler  
Noise level Lpa 51,7 dBA  
Protection class IPX4  
Adjustable feet Yes  
Drain max. height 950 mm

## Accessories Included

Water supply pipe Yes - 2,5m

Drain pipe Yes - 2m

## Equipment

Peristaltic detergent dispenser Yes, manual

## Benefit

### Interface

Control panel with electronic buttons

The electronic control panel features an intuitive interface with soft-touch buttons, allowing easy selection of one of the three wash programmes: short, medium, or intensive. There are also buttons for power, selection, and cycle start. The display provides real-time monitoring of the tank and boiler temperature, as well as diagnostics, ensuring effortless and immediate control of the main functions.

### 2-stage system

Two-stage filtration system to ensure optimal washing performance and maximum water purity.

The filtration system is entirely made of AISI 304 stainless steel, ensuring maximum resistance, durability, and corrosion protection. It consists of two filtration stages: the first features a grid that prevents dirt residues from entering the tank, thereby avoiding water clouding; the second protects the washing pumps by retaining any debris that may accidentally enter the tank during filter cleaning.

### HTR System

Consistent temperatures and pressures for uniform and effective dishwashing

Thanks to the HTR system (High Temperature Rinse) and the presence of the atmospheric boiler combined with the Thermostop, the cold inlet water does not enter the boiler during rinsing, ensuring a constant temperature of 85°C. The HTR system keeps the water hot for deep sanitisation and quick drying, ensuring constant pressure for uniform and effective cleaning.

### Door

Split and balanced doors for maximum ergonomics, with double-skin construction

The split, balanced doors are designed to ensure maximum ergonomics during the loading and unloading of utensils, making the process easier and minimising operator effort. Furthermore, the double-skin construction not only provides a robust structure but also ensures excellent thermal and acoustic insulation, helping to maintain a consistent internal temperature and reduce noise levels during operation, further enhancing the user experience.

### Drain pump

Partial water replacement during the wash cycle for clean and hygienic dishes

The standard drain pump, equipped with a partial water exchange system, ensures that the dirtiest water is automatically removed at every wash cycle. This mechanism allows for continuous renewal of the water used, ensuring that each phase of the washing process is carried out with clean water. The result is optimal dishwashing performance, with outstanding efficiency and an impeccable level of hygiene.

### Soft-start system

Effective management of the washing pump to protect your glassware

The Soft-Start function initiates the wash cycle gently and gradually, progressively increasing the water pressure. This system has been designed to provide optimal protection for the most fragile items, such as crystal glasses, significantly reducing the risk of chipping or damage. At the same time, it ensures excellent cleaning performance, combining efficiency and safety in every wash cycle.

## Wash pumps

Triple-pump washing system to effectively remove even the most stubborn dirt

The Smeg utensil washer is equipped with an innovative triple-pump washing system, designed to provide high power and an even distribution of water flow. This advanced technology ensures thorough and effective cleaning, removing even the most stubborn dirt residues.
