

UW6070DPS

Family	Professional dishwasher
Subfamily	Utensil washer
Type	Utensil washer
Crockery	Crockery; Cutlery; EN 600x400 trays; GN1/1 trays; Utensils
Basket dimensions	600x700 mm
Rinse pump	HTR system
Wash pump	Standard
Power connection	400 V 3N~ / 31,7 A / 12,7 kW / 50 Hz
Product dimensions (WxDxH)	800x860x2100 mm

Target

Industries	Hotels; Ristoranti / Catering; Bakeries / Pastry shops; Butcher shops / Delicatessens; Food Industries; Catering; Care facilities ; Commercial food services; Grocery shops / Food retail

Technical Features

Trays washing option	Yes	Rinse load	0,4 l/h
Water consumption per cycle	6 l	Usable load height	860 mm
Min. water connection temperature	5°C	Height open door	2465 mm
Max. inlet temperature	60°C	Depth with open door	1255 mm
Max water hardness	12°f - 7°dH	Maximum height no-basket wash	860 mm
Detergent load	1,5 l/h

Construction

Tank With printed base

Construction Single-skin

Tank material Stainless steel AISI 304

Back panel Galvanized

Upper wash system A 3-arms wash and one split rinse spray arms, stainless steel

Lower wash system A 4-arms wash and one split rinse spray arms, stainless steel; One single sideways wash and rinse spray arms, stainless steel

Tank filter Stainless steel

Rack guides Welded

Filter

Tank capacity 70 l

Boiler capacity 17 l

Boiler type Artmosferic boiler

Noise LpA<70 dB(A)

Protection class IPX4

Adjustable feet Yes

Drain max. height 950 mm

Accessories included

Cutlery basket 1x WH00S02

Flat basket 1x WB6070G01

Water supply hose Yes - 2,5 m

Drain hose Yes - 2m

Equipments

Drain pump Yes

Peristaltic detergent dispenser Manual

Peristaltic rinse-aid dispenser Manual

Partial renewal of water in the tank and built-in drain pump Yes

Water supply pipe diameter DN15 - ½"

Rinse boiler Thermostop system	Yes - default	Drain supply pipe diameter	DN20-G 3/4"
Wash pump soft start system	Yes	Detergent (red) hose lenght	2,2 m
Break tank	Yes	Rinse aid (blue) hose lenght	2,2 m

Interface

Control panel with electronic buttons

The electronic control panel features an intuitive interface with soft-touch buttons, allowing easy selection of one of the three wash programmes: short, medium, or intensive. There are also buttons for power, selection, and cycle start. The display provides real-time monitoring of the tank and boiler temperature, as well as diagnostics, ensuring effortless and immediate control of the main functions.

2-stage system

Two-stage filtration system to ensure optimal washing performance and maximum water purity

The filtration system is entirely made of AISI 304 stainless steel, ensuring maximum resistance, durability, and corrosion protection. It consists of two filtration stages: the first features a grid that prevents dirt residues from entering the tank, thereby avoiding water clouding; the second protects the washing pumps by retaining any debris that may accidentally enter the tank during filter cleaning.

HTR System

Consistent temperatures and pressures for uniform and effective dishwashing

Thanks to the HTR system (High Temperature Rinse) and the presence of the atmospheric boiler combined with the Thermostop, the cold inlet water does not enter the boiler during rinsing, ensuring a constant rinsing temperature according to the program setting. The HTR system keeps the water hot for deep sanitisation and quick drying, ensuring constant pressure for uniform and effective cleaning.

Door

Split and balanced doors for maximum ergonomics

The split and balanced doors have been designed with the aim of optimising ergonomics during tool loading and unloading operations. Their design allows for easier use, minimising the physical effort required from the operator. This helps improve work efficiency while also ensuring greater comfort and safety in the working environment.

Drain pump

Partial water replacement during the wash cycle for clean and hygienic dishes

The standard drain pump, equipped with a partial water exchange system, ensures that the dirtiest water is automatically removed at every wash cycle. This mechanism allows for continuous renewal of the water used, ensuring that each phase of the washing process is carried out with clean water. The result is optimal dishwashing performance, with outstanding efficiency and an impeccable level of hygiene.

Soft-start system

Effective management of the washing pump to protect your glassware

The Soft-Start function initiates the wash cycle gently and gradually, progressively increasing the water pressure. This system has been designed to provide optimal protection for the most fragile items, such as crystal glasses, significantly reducing the risk of chipping or damage. At the same time, it ensures excellent cleaning performance, combining efficiency and safety in every wash cycle.

Wash pumps

Double-pump washing system to effectively remove even the most stubborn dirt

The Smeg utensil washer is equipped with an innovative double-pump washing system, designed to provide high power and an even distribution of water flow. This advanced technology ensures thorough and effective cleaning, removing even the most stubborn dirt residues.

Side spray wash

Equipped with lateral washing arms to reach even the most difficult corners

The washing system is equipped with lateral washing arms designed to ensure complete coverage, reaching every corner and ensuring that no surface is left uncovered. Thanks to this advanced technology, even baskets and large items are treated with thorough and impeccable cleaning, removing all traces of dirt and ensuring excellent results at every stage of the washing process.
