Technical Features

Type of motor                      Brushless/Inverter  
Electronic control                      Yes  
functioning  
Programme selection                      Yes  
knob  
Spin speed selection on                      No spin/ 400/ 800/ 1000/  
display/LED                      1200/ 1400  
Display/led for                      Yes  
temperature regulation  
Polypropilene tank                      Yes  
Basket                      Stainless steel  
Drum capacity                      61 l  
Door diameter                      33 cm

Door opening                      135°  
Automatic variable load                      Yes  
Antifoam system                      Yes  
Load balancing system                      Automatic  
Easy to access filter                      Yes  
Child lock (functions                      Control block  
block)  
Anti-flood system                      Yes  
Water supply                      Single, cold

Performance / Energy Label

Washing loading                      9 kg  
capacity  
Drying loading capacity                      6 kg  
Max spin speed                      1400 giri/min  
Energy efficiency class                      A  
Washing efficiency                      A  
class  
Energy rating                      AA  
Noise level washing                      53 dB(A) re 1 pW

Noise level spinning                      74 dB(A) re 1 pW  
Noise level drying                      60 dB(A) re 1 pW  
Energy consumption -                      0.96 kWh  
Cotton 60° - Wash only  
Energy consumption                      6.12 kWh  
(washing + drying)  
Duration of the                      645 min  
normative programme  
Energy annual                      1224 kWh  
consumption  
(washing+drying)  
Water annual                      23600 l  
consumption  
(washing+drying)

## Symbols glossary

**Variable load:** In all models of washing machines is present the system of variable load, according to which the machine automatically diversifies the wash cycle and the time of operation depending on the quantity and type of laundry introduced, allowing a significant saving of water and energy power, up to 30% compared to the versions with fixed load.

**Automatic Load Balancing:** provides an ideal distribution of laundry in the drum. In case if the imbalance is detected, the rotation speed starts being controlled in such way to evenly redistribute laundry in the drum, and thus reduce vibration.

**Child lock:** some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

**Delay timer:** can be set to run the programme at a convenient time or to take advantage of off-peak energy periods.

**LED display:** to show programmes, functions and options selected and the time to the end of the cycle.

**33 cm:** Large loading hatch of 30-32-33 cm in diameter, makes laundry loading and unloading easier and faster with maximum ease of use.

**Gentle drying:** program designed to get laundry ready for easy ironing.

This option advises when the periodic cleaning of the filters is needed, in order to avoid forgetfulness and thus guarantee the perfect functioning of the dryer over time. The convenient position of the filters makes maintenance fast and extremely simple.

Smeg's evolution towards more intelligent and eco-friendly models has led to the choice of Inverter technology, which significantly reduces consumption.

**Antiallergic:** Antiallergic program with particular attention to the total removal of residual detergent.

**Cotton 40°:** For soiled fabrics in cotton

**Cotton 60°:** For soiled fabrics in cotton

To drain the water in the machine.

**Super fast 12 min:** a programme designed to wash small amounts of laundry fast, ideal for washing lightly soiled garments.

**Duvet:** gentle cycle specific for duvet.

**Extra rinse:** The Extra rinse option: can be added to the selected programme when more thorough cleansing of special fabrics is needed.

**Synthetics:** to wash your synthetic clothes (shirts, blouses, synthetic/cotton blends, etc.). It washes with a gentle action and has a shorter washing cycle compared to the Cottons programme. For curtains and tulle, use the Synthetic 40°C programme with prewash and anti-creasing functions selected. As their meshed texture causes excessive foaming, wash the veils/tulle by putting little amount of detergent into the main wash compartment. Do not put detergent in the prewash compartment.

**Wool:** this programme for wool or delicate fabrics uses slower rotations of the drum to ensure the utmost care for clothing.
