## Symbols glossary

**Total acquastop:** Most models of Smeg dishwashers are equipped with Acquastop Totale, which allows to avoid flooding as a result of water leakage. The system consists of a float sensor, disposed under the inner chamber of a dishwasher, which blocks water supply inside the appliance in case of water leakage into the lower tray. An additional electromagnetic valve on the water inlet hose also automatically blocks water supply if detecting water leakage in the hose. For Laundry: Total acquastop, the product is built with 3 levels of anti-flood devices to ensure protection against water leakage.

**Easy Iron:** this is an option which can be selected to ensure the finished laundry is left with less creases to make ironing easier.

**Variable load:** In all models of washing machines is present the system of variable load, according to which the machine automatically diversifies the wash cycle and the time of operation depending on the quantity and type of laundry introduced, allowing a significant saving of water and energy power, up to 30% compared to the versions with fixed load.

**Autocleaning system:** Autocleaning system avoids the formation of lint and impurities inside the condensation system ensuring maximum reliability of the machine.

**Automatic Load Balancing:** provides an ideal distribution of laundry in the drum. In case if the imbalance is detected, the rotation speed starts being controlled in such way to evenly redistribute laundry in the drum, and thus reduce vibration.

**Energy efficiency class E**

**LED display:** to show programmes, functions and options selected and the time to the end of the cycle.

**30 cm:** Large loading hatch of 30-32-33 cm in diameter, makes laundry loading and unloading easier and faster with maximum ease of use.

This shows the amount of laundry that can be inserted into the tumble dryer in KG.

**Gentle drying:** program designed to get laundry ready for easy ironing.

**B:** Product energy rating, measured from A+++ to D / G depending on the product family.

This option advises when the periodic cleaning of the filters is needed, in order to avoid forgetfulness and thus guarantee the perfect functioning of the dryer over time. The convenient position of the filters makes maintenance fast and extremely simple.

**Intensive option:** this function extends the duration of the wash cycle and increases the intensity of the wash, ensuring a deeper cleaning for heavily soiled garments.

**Prewash:** program designed for heavily soiled garments.

**Cleaning programme:** A cleaning programme has been created to maintain the performance of washer/dryers. The display shows automatically when cleaning is required.

**For lightly soiled fabrics in cotton and linen**

**Cotton 40°:** For soiled fabrics in cotton

**Cotton 60°:** For soiled fabrics in cotton
