Symbols glossary

	Autocleaning system: Autocleaning system avoids the formation of lint and impurities inside the condensation system ensuring maximum reliability of the machine.		Automatic Load Balancing: provides an ideal distribution of laundry in the drum. In case if the imbalance is detected, the rotation speed starts being controlled in such way to evenly redistribute laundry in the drum, and thus reduce vibration.
	Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.		Delay timer: can be set to run the programme at a convenient time or to take advantage of off-peak energy periods.
	LED display: to show programmes, functions and options selected and the time to the end of the cycle.		Gentle drying: program designed to get laundry ready for easy ironing.
	This option advises when the periodic cleaning of the filters is needed, in order to avoid forgetfulness and thus guarantee the perfect functioning of the dryer over time. The convenient position of the filters makes maintenance fast and extremely simple.		Smeg's evolution towards more intelligent and eco-friendly models has led to the choice of Inverter technology, which significantly reduces consumption.
	Cleaning programme: A cleaning programme has been created to maintain the performance of washer/dryers. The display shows automatically when cleaning is required.		Cotton: programme designed for washing medium to heavily soiled cotton garments, ensuring thorough and effective cleaning.
	Extra Rinse: Extra Rinse: adds an extra rinse cycle to that already provided in the program chosen, to remove any residual detergent. This function is particularly suitable for those with allergies or skin problems.		Mixed fabrics: this cycle is designed for lightly soiled laundry in a mix of cottons and synthetics, or can be used just to refresh stored items.
	Quick 15 min.: ideal for small loads of lightly soiled garments, it guarantees a fast wash in a very short time.		Rinse and Spin: this programme is suitable for rinsing and spinning garments.
	Spin: a programme designed to perform an effective spin cycle to remove excess water from garments.		Wool: this programme for wool or delicate fabrics uses slower rotations of the drum to ensure the utmost care for clothing.
	Option that allow to reduce times of the selected program.		Volumeplus: Smeg offers models with load up to 8 kg, while maintaining the best washing results, and providing low energy consumption.
	By setting the drying time to 60min it is possible to reach the desired drying level at low temperatures. The program stops at the end of the selected		Antiallergic + Steam: program designed for those with sensitive skin. The addition of steam in combination with an energetic washing and rinsing action of the garments, even the most delicate, helps to ensure a high level of hygiene and greater care and attention in the complete elimination of detergents.
