WDN064SLDUK

EAN Code	8017709328436
Product Family	Washer dryer
Commercial width	60 cm
Commercial depth	Standard capacity
Installation	Free-standing
Load type	Frontal

Programmes

Controls	Electronic
Programmes graphics	Written in EN
No. of programmes	14

Programmes

Eco 40-60	Synthetic dry	Wash&Dry Anti allergy
Wash&Dry Cotton 6kg	Wash&Dry Express	Cotton
Cotton Dry	Drain + Spin	Mix
Quick Wash 14 min	Rinse	Shirts
Synthetics	Wool	

Washing Temperature

Cool	30°C	40°C
60°C	90°C	

Special programmes

Wash&Dry Cotton 6kg	Wash&Dry Anti allergy	Wash&Dry Express
Wool	Quick 14 min	

Display

Residual time indicator	delay start	programme status indication
spin regulation	temperature regulation	

Display type LCD DISPLAY

Buttons/Options

Ending in	Extra rinse	Spin Speed
Temperature	Prewash	Anti-wrinkle (easy ironing)
Quick	Steam	Drying

Programme progress indicator (light)	On display
End of cycle indicator (light)	On display

Technical Features

Type of motor	Brushless/Inverter	**Door opening**	170°
Electronic control functioning	Yes	**Automatic variable load**	Yes
Programme selection knob	Yes	**Antifoam system**	Yes
Spin speed selection on display/LED	No spin/ 600/ 800/ 1200/ 1400/ Rinse hold	**Load balancing system**	Automatic
Display/led for temperature regulation	Yes	**Easy to access filter**	Yes
Polypropilene tank	Yes	**Child lock (functions block)**	Control block
Basket	Stainless steel	**Anti-flood system**	Yes
Drum capacity	65 l	**Aquastop system**	Acquastop tube
Door diameter	34 cm	**Water supply**	Single, cold

Symbols glossary

Acquastop: Some Smeg dishwashers are equipped with a simple Acquastop: float sensor in the bottom which is necesary to prevent an accidental leakage of water inside the appliance.

Variable load: In all models of washing machines is present the system of variable load, according to which the machine automatically diversifies the wash cycle and the time of operation depending on the quantity and type of laundry introduced, allowing a significant saving of water and energy power, up to 30% compared to the versions with fixed load.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

LCD display: to optimize performance and simplify the use of the appliance.

Gentle drying: program designed to get laundry ready for easy ironing.

Inverter technology: The evolution of Smeg's driers towards more intelligent and environmentally sustainable models has led to the choice of using Inverter technology with heat pumps, which reduces significantly energy consumption.

Program for drying cotton items including sheets, pillow cases, pajamas, lingerie, tablecloths, etc

Wash & Dry: a programme designed to wash and dry up to 6 Kg of cotton laundry in one continuous cycle, without requiring any additional settings. Thanks to the optimisation of both washing and drying phases, it delivers effective and convenient results, leaving garments ready to wear or store at the end of the programme.

Easy Iron: this is an option which can be selected to ensure the finished laundry is left with less creases to make ironing easier.

Automatic Load Balancing: provides an ideal distribution of laundry in the drum. In case if the imbalance is detected, the rotation speed starts being controlled in such way to evenly redistribute laundry in the drum, and thus reduce vibration.

Energy efficiency class D

34 cm: Large loading hatch of 34 cm in diameter, makes laundry loading and unloading easier and faster with maximum ease of use.

This option advises when the periodic cleaning of the filters is needed, in order to avoid forgetfulness and thus guarantee the perfect functioning of the dryer over time. The convenient position of the filters makes maintenance fast and extremely simple.

Prewash: program designed for heavily soiled garments.

Use to wash your normally soiled, durable cotton and linen laundry. Although it washes longer than all other programmes, it provides high energy and water savings. Actual water temperature may be different from the stated wash temperature. When you load the machine with less laundry (e.g. ½ capacity or less), programme time may automatically get shorter. In this case, energy and water consumption will decrease more, providing a more economic wash. This programme is available in the models with the remaining time indicator.

Cotton: For soiled fabrics in cotton

To drain the water in the machine.

Super fast 14 min.: a programme designed to wash small amounts of laundry fast, ideal for washing lightly soiled garments.

Shirts: a cycle to wash shirts in a short time with the utmost care, using a delicate spin for easy ironing.

Synthetics: to wash your synthetic clothes (shirts, blouses, synthetic/cotton blends, etc.). It washes with a gentle action and has a shorter washing cycle compared to the Cottons programme. For curtains and tulle, use the Synthetic 40°C programme with prewash and anti-creasing functions selected. As their meshed texture causes excessive foaming, wash the veils/tulle by putting little amount of detergent into the main wash compartment. Do not put detergent in the prewash compartment.

Option that allow to reduce times of the selected program.

Mixed fabrics: this cycle is designed for lightly soiled laundry in a mix of cottons and synthetics, or can be used just to refresh stored items.

Extra rinse: The Extra rinse option: can be added to the selected programme when more thorough cleansing of special fabrics is needed.

Program for delicately treating garments in synthetic or mixed fabrics, such as t-shirts and blouses.

Wool: this programme for wool or delicate fabrics uses slower rotations of the drum to ensure the utmost care for clothing.

Steam Option: the steam is perfect for smoothing out creases, refreshing fabrics, neutralizing odors and releasing dirt, destroying allergens more quickly than by washing the item in water.
