

WMFABBL-2

EAN Code	8017709229733
Product Family	Washing Machine
Commercial width	60 cm
Commercial depth	Large capacity
Installation	Free-standing
Load type	Frontal

Aesthetics

Aesthetic	50's Style	Door window	
Front panel colour	Black	Handle colour	Black
Led/display colour	Orange	Drawer Color	
Front panel type	Smeg LI 2010	Cabinet colour	Black
Function buttons colour	Black	Top colour	Black
No. of control knobs	1	Available colours	WMFABPB-2; WMFABCR-2; WMFABPK-2
Programme/temperature knob colour	Black	Alternative colours available	Pink, Pastel blue, Cream
Door colour	Black

Technical Features

					
Type of motor	Standard				
Electronic control	Yes				
functioning					

Door diameter	30 cm
Door opening	110°
Automatic variable load	Yes

Programme selection knob	Yes	Antifoam system	Yes
Spin speed selection on display/LED	No spin/ 600/ 800/ 1000/ 1200/ 1400	Load balancing system	Automatic
Display/led for temperature regulation	Yes	Easy to access filter	Yes
Polypropylene tank	Yes	Child lock (functions block)	Control block
Basket	Stainless steel	Anti-flood system	Yes
Drum capacity	54 l	Aquastop system	Total
Liquid detergent accessory as standard	Yes		

Performance / Energy Label - Reg. 2019

Supplier's name or trademark	SMEG
------------------------------	------

Electrical Connection

Nominal power	2200 W	Frequency (Hz)	50 Hz
Current	10 A	Power supply cable length	175 cm
Voltage (V)	220-240 V		

Compatible Accessories

KITPLV2

Kit extension for dishwasher and washing machine: lenght mt. 2

Symbols glossary

 A++: Energy efficiency class A++ helps to save up to 20% energy compared to class A. Maximum performance with minimum consumption is guaranteed.	 Total acquastop: Most models of Smeg dishwashers are equipped with Acquastop Totale, which allows to avoid flooding as a result of water leakage. The system consists of a float sensor, disposed under the inner chamber of a dishwasher, which blocks water supply inside the appliance in case of water leakage into the lower tray. An additional electromagnetic valve on the water inlet hose also automatically blocks water supply if detecting water leakage in the hose. For Laundry: Total acquastop, the product is built with 3 levels of anti-flood devices to ensure protection against water leakage.
 Easy Iron: this is an option which can be selected to ensure the finished laundry is left with less creases to make ironing easier.	 Variable load: In all models of washing machines is present the system of variable load, according to which the machine automatically diversifies the wash cycle and the time of operation depending on the quantity and type of laundry introduced, allowing a significant saving of water and energy power, up to 30% compared to the versions with fixed load.
 Automatic Load Balancing: provides an ideal distribution of laundry in the drum. In case if the imbalance is detected, the rotation speed starts being controlled in such way to evenly redistribute laundry in the drum, and thus reduce vibration.	 Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.
 Cold Wash: a programme designed for the effective washing of moderately soiled garments at low temperatures. Thanks to a specially developed washing algorithm, it delivers excellent cleaning results while helping preserve fabrics, colours and energy efficiency.	 Delay timer: can be set to run the programme at a convenient time or to take advantage of off-peak energy periods.
 LED display: to show programmes, functions and options selected and the time to the end of the cycle.	 30 cm: Large loading hatch of 30-32-33 cm in diameter, makes laundry loading and unloading easier and faster with maximum ease of use.
 This option advises when the periodic cleaning of the filters is needed, in order to avoid forgetfulness and thus guarantee the perfect functioning of the dryer over time. The convenient position of the filters makes maintenance fast and extremely simple.	 FlexiTime: The FlexiTime option allows the user to reduce the time of the cycle selected, providing extra flexibility and control.
 Intensive option: this function extends the duration of the wash cycle and increases the intensity of the wash, ensuring a deeper cleaning for heavily soiled garments.	 No spin option: this option allows to exclude the last spin phase, draining the water from the tank
 Prewash: program designed for heavily soiled garments.	 Cotton: programme designed for washing medium to heavily soiled cotton garments, ensuring thorough and effective cleaning.

 Eco 40-60: reference programme defined by EU regulations for measuring the energy performance of washing machines. Ideal for normally soiled cotton garments washable at 40 °C or 60 °C, it provides an excellent balance between cleaning performance and savings, although it requires a longer washing time.	 Delicate: Clothing such as underwear, hosiery and luxury fabrics should be dried on the delicate cycle to help extend the life of the clothing.
 To drain the water in the machine.	 Extra Rinse: Extra Rinse: adds an extra rinse cycle to that already provided in the program chosen, to remove any residual detergent. This function is particularly suitable for those with allergies or skin problems.
 Hand wash: this specific programme for delicate fabrics uses slower rotations of the drum to ensure the utmost care for clothing.	 Jeans: a washing cycle which is kind to the colour and fabric of denim whilst minimising wrinkles.
 Mixed fabrics: this cycle is designed for lightly soiled laundry in a mix of cottons and synthetics, or can be used just to refresh stored items.	 Night: an ideal programme for those who want to take advantage of off-peak energy periods, this cycle is particularly quiet due to slower rotations of the drum.
 Quick 15 min.: ideal for small loads of lightly soiled garments, it guarantees a fast wash in a very short time.	 Super fast: a programme designed to wash small amounts of laundry fast, ideal for washing lightly soiled garments.
 Rinse and Spin: this programme is suitable for rinsing and spinning garments.	 Shirts: Specific program that allows you to wash shirts with the utmost attention. The addition of steam at the end of the cycle ensures a reduction in the formation of creases and ironing times.
 Softener	 Sport: programme designed to quickly wash sports and technical clothing, which undergo frequent washes, ensuring optimal hygiene and protection of the fibres.
 Synthetics: programme designed for synthetic and mixed-fibre fabrics. Ideal for lightly to normally soiled garments, it uses moderate temperatures and a gentler washing action to protect the fibres and reduce creasing, ensuring effective cleaning without stressing the materials.	 Wool: this programme for wool or delicate fabrics uses slower rotations of the drum to ensure the utmost care for clothing.
 Volumeplus: Smeg offers models with load up to 8 kg, while maintaining the best washing results, and providing low energy consumption.	 Drum has maximum capacity of 7kg of dry laundry.

Benefit (TT)

Large capacity

Large capacity to handle heavy loads with advanced programs for impeccable results every wash

15 programmes

Up to 15 programmes to meet every daily need

LED Display

With soft touch control and LED lights for intuitive and fast setting and selection of each option
