Technical Features

Type of motor Brushless/Inverter
Electronic control functioning Yes
Programme selection knob Yes
Spin speed selection on display/LED No spin/ 600/ 800/ 1200/ 1600/ Rinse hold
Display/led for temperature regulation Yes
Polypropylene tank Yes
Basket Stainless steel
Drum capacity 65 l
Liquid detergent accessory as standard Yes

Door diameter 34 cm
Door opening 160°
Automatic variable load Yes
Antifoam system Yes
Load balancing system Automatic
Easy to access filter Yes
Child lock (functions block) Control block
Anti-flood system Yes

Performance / Energy Label

Supplier's name or trademark SMEG
Rated Capacity 9 kg
Energy Efficiency Class A
Energy_cons_100 49 kWh
Water Consumption 49 litres

Spin-drying efficiency class A
Airborne acoustical noise class C
Airborne acoustical noise 78 dB(A) re 1 pW
Programme duration at rated capacity 3:48 h:min

Compatible Accessories

KITPLV2

Kit extension for dishwasher and washing machine: length mt. 2

Symbols glossary

	Variable load: In all models of washing machines is present the system of variable load, according to which the machine automatically diversifies the wash cycle and the time of operation depending on the quantity and type of laundry introduced, allowing a significant saving of water and energy power, up to 30% compared to the versions with fixed load.		Automatic Load Balancing: provides an ideal distribution of laundry in the drum. In case if the imbalance is detected, the rotation speed starts being controlled in such way to evenly redistribute laundry in the drum, and thus reduce vibration.
	Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.		LED display: to show programmes, functions and options selected and the time to the end of the cycle.
	34 cm: Large loading hatch of 34 cm in diameter, makes laundry loading and unloading easier and faster with maximum ease of use.		This option advises when the periodic cleaning of the filters is needed, in order to avoid forgetfulness and thus guarantee the perfect functioning of the dryer over time. The convenient position of the filters makes maintenance fast and extremely simple.
	Inverter technology: The evolution of Smeg's driers towards more intelligent and environmentally sustainable models has led to the choice of using Inverter technology with heat pumps, which reduces significantly energy consumption.		Antiallergic: Antiallergic program with particular attention to the total removal of residual detergent.
	Cleaning programme: A cleaning programme has been created to maintain the performance of washer/dryers. The display shows automatically when cleaning is required.		Cotton: For soiled fabrics in cotton
	Use to wash your normally soiled, durable cotton and linen laundry. Although it washes longer than all other programmes, it provides high energy and water savings. Actual water temperature may be different from the stated wash temperature. When you load the machine with less laundry (e.g. ½ capacity or less), programme time may automatically get shorter. In this case, energy and water consumption will decrease more, providing a more economic wash. This programme is available in the models with the remaining time indicator.		To drain the water in the machine.
	Mixed fabrics: this cycle is designed for lightly soiled laundry in a mix of cottons and synthetics, or can be used just to refresh stored items.		Super fast 14 min.: a programme designed to wash small amounts of laundry fast, ideal for washing lightly soiled garments.
	Refresh: an ideal program to refresh the garments that have been kept for a long time indoors and eliminate unpleasant odors, without having to wash.		Extra rinse: The Extra rinse option: can be added to the selected programme when more thorough cleansing of special fabrics is needed.

Shirts: a cycle to wash shirts in a short time with the utmost care, using a delicate spin for easy ironing.

Synthetics: to wash your synthetic clothes (shirts, blouses, synthetic/cotton blends, etc.). It washes with a gentle action and has a shorter washing cycle compared to the Cottons programme. For curtains and tulle, use the Synthetic 40°C programme with prewash and anti-creasing functions selected. As their meshed texture causes excessive foaming, wash the veils/tulle by putting little amount of detergent into the main wash compartment. Do not put detergent in the prewash compartment.

Wool: this programme for wool or delicate fabrics uses slower rotations of the drum to ensure the utmost care for clothing.

Option that allow to reduce times of the selected program.

Steam Option: the steam is perfect for smoothing out creases, refreshing fabrics, neutralizing odors and releasing dirt, destroying allergens more quickly than by washing the item in water.

Volumeplus: Smeg offers models with load up to 8 kg, while maintaining the best washing results, and providing low energy consumption.

Drum has maximum capacity of 9kg of dry laundry.

Energy efficiency class A

Benefit

Large capacity

Large capacity to handle heavy loads with advanced programs for impeccable results every wash

15 programmes

Up to 15 programmes to meet every daily need

LED Display

With soft touch control and LED lights for intuitive and fast setting and selection of each option

Steam Energy Technology

Perfectly removes stains, odours, creases, and allergens with the power of steam

Steam Energy technology, uses steam, at the beginning or end of the cycle depending on the programme, to remove stains, creases, smells and allergens.

Inverter

Brushless, it offers greater energy efficiency, lower consumption and longer life, reducing wear and noise. It optimises consumption and ensures high performance while maintaining high washing efficiency.

Giant door

The size of the door offers greater convenience and versatility, facilitating the loading and unloading of laundry thanks to its wide opening, and gives a more premium and elegant look, enriching the overall design of the appliance
