

Product fiche concerning the COMMISSION DELEGATED REGULATION (EU) No 1061/2010 of 28 September 2010

Rated capacity in kg of cotton for the standard 60 °C cotton programme at full load or the 40 °C cotton programme at full load, whichever is the lower Energy efficiency class Energy consumption "X" kWh per year, based on 220 standard washing cycles for otton programmes at 60 °C and 40 °C at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used Energy consumption - Cotton 60° full load Energy consumption - Cotton 60° full load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - Stand by left on mode O.80 W Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C c at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programmes are suitable to clean normally solled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Programme time of the 'standard 60 °C cotton programme' at partial load Programme time of the 'standard 40 °C cotton programme' at partial load Programme time of the 'standard 40 °C cotton programme' at partial load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton p	Supplier name or brand	SMEG
Energy efficiency class Energy consumption "X" kWh per year, based on 220 standard washing cycles for othe low-power modes. Actual energy consumption will depend on how the appliance is used Energy consumption - Cotton 60° full load Energy consumption - Cotton 60° full load Energy consumption - 60 °C cotton programme at partial load Energy consumption - 60 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption of the off-mode Energy consumption - Stand by left on mode Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 40 °C cotton programme at full load or the standard 40 °C cotton pro	Product code	LBB14PB-2
Energy consumption "X" kWh per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used Energy consumption - Cotton 60° full load Energy consumption - 60 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 51 and by left on mode O.80 W Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) B. Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load or the standard washing programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Programme time of the 'standard 60 °C cotton programme' at partial load Programme time of the 'standard 60 °C cotton programme' at partial load Frogramme time of the 'standard 40 °C cotton programme' at partial load Frogramme time of the 'standard 60 °C cotton programme' at partial load Frogramme time of the 'standard 60 °C cotton programme' at partial load Frogramme time of the 'standard 60 °C cotton programme' at partial load Frogramme time of the 'standard 60 °C cotton programme' at partial load Frogramme time of the 'standard 60 °C cotton programme' at partial load Frogramme time of the 'standard 60 °C cotton programme at full load	Rated capacity in kg of cotton for the standard 60 °C cotton programme at full load or the 40 °C cotton programme at full load, whichever is the lower	7 kg
cotton programmes at 60 °C and 40 °C at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used Energy consumption - Cotton 60° full load Energy consumption - 60 °C cotton programme at partial load Energy consumption - 60 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load Meighted power consumption of the off-mode Energy consumption - Stand by left on mode O.80 W Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load or Remaining moisture content attained Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Too min Programme time of the 'standard 60 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' at partial load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load	Energy efficiency class	A++
Energy consumption - 60 °C cotton programme at partial load Energy consumption - 40 °C cotton programme at partial load 0.82 KWh Weighted power consumption of the off-mode Energy consumption - Stand by left on mode Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Remaining moisture content attained Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 60 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load	Energy consumption "X" kWh per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used	193 KWh
Energy consumption - 40 °C cotton programme at partial load 0.64 KWh Weighted power consumption of the off-mode Energy consumption - Stand by left on mode 0.80 W Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Remaining moisture content attained 53 % Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 40 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load	Energy consumption - Cotton 60° full load	1.03 KWh
Weighted power consumption of the off-mode Energy consumption - Stand by left on mode Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) B Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Remaining moisture content attained Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load 150 min Programme time of the 'standard 60 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load	Energy consumption - 60 °C cotton programme at partial load	0.82 KWh
Energy consumption - Stand by left on mode Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Remaining moisture content attained Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Programme time of the 'standard 60 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load	Energy consumption - 40 °C cotton programme at partial load	0.64 KWh
Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Remaining moisture content attained Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Programme time of the 'standard 60 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load	Weighted power consumption of the off-mode	0.2 W
cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient) Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Remaining moisture content attained Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Programme time of the 'standard 60 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load	Energy consumption - Stand by left on mode	0.80 W
Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Remaining moisture content attained Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Programme time of the 'standard 60 °C cotton programme' at partial load 150 min Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW	Water consumption "X" litres per year, based on 220 standard washing cycles for cotton programmes at 60 °C and 40 °C at full and partial load. Actual water consumption will depend on how the appliance is used	10340
the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o Remaining moisture content attained Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Programme time of the 'standard 60 °C cotton programme' at partial load Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW	Spin-drying efficiency class "X" on a scale from G (least efficient) to A (most efficient)	В
Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Programme time of the 'standard 60 °C cotton programme' at partial load Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW	Maximum spin speed attained for the standard 60 °C cotton programme at full load or the standard 40 °C cotton programme at partial load, whichever is the lower, and remaining moisture content attained for the standard 60 °C cotton programme at full load o	1400 giri/min
relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption Programme time of the 'standard 60 °C cotton programme' at full load Programme time of the 'standard 60 °C cotton programme' at partial load Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW	Remaining moisture content attained	53 %
Programme time of the 'standard 60 °C cotton programme' at partial load Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW	Standard washing programmes to which the information in the label and the fiche relates. These programmes are suitable to clean normally soiled cotton laundry and they are the most efficient programmes in terms of combined energy and water consumption	Cotton 60° and Cotton 40°
Programme time of the 'standard 40 °C cotton programme' Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW	Programme time of the 'standard 60 °C cotton programme' at full load	150 min
Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW	Programme time of the 'standard 60 °C cotton programme' at partial load	150 min
phase for the standard 60 °C cotton programme at full load Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load 78 dB(A) re 1pW	Programme time of the 'standard 40 °C cotton programme'	150 min
phase for the standard 60 °C cotton programme at full load	Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the washing phase for the standard 60 °C cotton programme at full load	59 dB(A) re 1pW
Built in No	Airborne acoustical noise emissions expressed in dB(A) re 1 pW during the spinning phase for the standard 60 °C cotton programme at full load	78 dB(A) re 1pW
	Built in	No
