- 

**Fan with grill element:** The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.

**Light**
- 

**Circulaire with upper and lower elements:** The use of the fan with both elements allows food to be cooked quickly and effectively, ideal for large joints that require thorough cooking. It offers a similar result to rotisserie, moving the heat around the food, instead of moving the food itself, enabling any size or shape to be cooked.

**Overheat protection:** The safety system that automatically turns off the hob in case of overheating of the control unit.
- 

**Induction:** The work of these hobs is based on the principle of electromagnetic induction. The heat is generated directly in the bottom of the pan during its contact with the hob.

**All glass inner door:** All glass inner door, a single flat surface which is simple to keep clean.
- 

**The inner door glass:** can be removed with a few quick movements for cleaning.

**Side lights:** Two opposing side lights increase visibility inside the oven.
- 

**Automatic opening:** some models have Automatic opening door when the cycle is finished which is a perfect solution for handle-less kitchen units as no handle is needed. For safety reasons, the door locks automatically when the machine is in use to avoid it being opened inadvertently.

**Overfill protection:** The special overfill protection shuts down the stove in the presence of overflow of liquids.
- 

**Pyrolytic:** Pyrolytic cleaning cycles can be selected as necessary to automatically clean the oven interior.

**Indication of residual heat:** After the glass ceramic hob is switched off the residual heat indicator shows which of the heating zones still remains hot. When the temperature drops below 60 ° C, the indicator goes out.
- 

**Removable roof liner:** This is a perfect solution that protects the upper part of the cavity of the oven from pollution. Easy to remove for cleaning, it can be washed in the dishwasher.

**The oven cavity has 4 different cooking levels.**
- 

**The oven cavity has 5 different cooking levels.**

**Telescopic rails:** allow you to pull out the dish and check it without having to remove it from the oven entirely.
