length150 cm

Not included accessories

BNP608T

Teflon-coated tray, 8mm depth, to be placed on the grid

GTT

Totally extractable telescopic guides (1 level), suitable for traditional ovens. Made in stainless steel, they guarantee stability and facilitate the smooth extraction of the trays.

GTP

Partially extractable telescopic guides (1 level), suitable for traditional ovens. Made in stainless steel, they guarantee stability and facilitate the smooth extraction of the trays.

PPR9

Refractary pizza stone without handles. Squared shaped stone: L64xH2,3xP37,5 cm Suitable also for gas ovens, to be put on the griddle.

Symbols glossary

A+: Energy efficiency class A+ helps to save up to 10% energy compared to class A. Maximum performance with minimum consumption is guaranteed.

Air cooling system: to ensure a safe surface temperatures.

Triple glazed doors: Number of glazed doors.

Electric

<u>. </u>	
1.000	۰C
164.7	-

Fresh Touch: Most of Smeg ovens have a "cool door." Thanks to the combination of tangential cooling and internal heat-reflecting glasses, the temperature on the outer surface of the door is maintained below 50° C. In addition to providing safety, this system protects the sides of the furniture from overheating by the oven.

Static: Traditional cooking suitable for the preparation of one dish at a time. The fan is not active and the heat comes from below and from above at the same time. Static cooking is slower and more delicate, ideal in order to get well cooked and dry dishes even inside. Ideal for cooking all types of roasts, fatty meats, bread, filled cakes.

Child lock: some models are fitted with a device to lock the programme/cycle so it cannot be accidentally changed.

S

Defrost by time: Manual defrost function. At the end of the set duration, the function stops.

230

R

Automatic lighting deactivation: For greater energy savings, the lighting turns off automatically after one minute from the start of cooking The option can be disabled via the settings menu. In this case the light will remain on for the entire duration of cooking.

Ever Clean Enamel: Ever Clean enamel is applied electrostatically, corner to corner and edge to edge to prevent cracking or cracks over time. It is a particular pyrolytic enamel, resistant to acids which, in addition to being pleasantly bright, promotes greater cleaning of the oven walls, thanks to its lower porosity. It is baked at over 850 ° C and slowly polymerized at a scientifically determined rate to ensure uniform depth and strength Ever Clean enamel creates an impeccable finish both on the inside of the oven and on the trays, making the surfaces of the oven incredibly easy to maintain over time as it reduces the adhesion of fat during cooking

Fan assisted: Intense and homogeneous traditional cooking, also suitable for complex recipes. The fan is active and the heat comes from below and from above at the same time. Ventilated cooking ensures a faster and more homogeneous result, leaving fragrant foods outside and moister inside. Ideal for baked pasta, biscuits, roasts and cobblers.

Base: the heat comes only from the bottom of the cavity. The fan is not active. Ideal for sweet and savory pies, cobblers and pizzas. Designed to complete cooking and make food more crunchy This symbol in gas ovens indicates the gas burner.

Circulaire: it is the perfect function for cooking all types of dishes in a more delicate way. The heat comes from the back of the oven and is distributed quickly and evenly The fan is active. It is also ideal for cooking on multiple levels without mixing smells and flavors.

 function is particularly suitable for cooking on a single sheft with low energy consumption. It's recommended for all types of food except those that can generate a lot of moisture (for example vegetables). To achieve maximum energy savings and reduce time, it is recommended to put the food in the oven without preheating the cooking compartment Fan grill: very intense heat coming only from above from a double heating element. The fan is not active. It allows the optimal grilling of thickest meats. Ideal for large cuts of meat. Fan grill: very intense heat coming only from above from a double heating element. The fan is not active. It allows the optimal grilling of thickest meats. Ideal for large cuts of meat. Turbo: the heat comes from 3 directions: above, below and from the back of the oven The fan is not active. It allows quick cooking, even on several shelves without mixing the aromas. Ideal for large volumes or foods that require intense cooking. All glass inner door: All glass inner door, a single flat surface which is simple to keep clean. All glass inner door: All glass inner door, a single flat surface which is simple to keep clean. All glass inde and or cowing in the cavity for allotted SABBATH: function that allows to cook food respecting Judaism's day of rest provisions. Soft close: all models are equipped with advanced function of smooth closing of the door, which allows the device to close smoothly and quietly. Electronic control: Allows you to maintain temperature inside the orew with the precision 2-3 °C. This enables to cook flat the requires in a close, souffles, puddings.
